Achieving Responsible AI with SAFe®

Brought to you by Outcomes360

As organizations rush to integrate AI, few have a clear path for doing it responsibly. This course empowers leaders, change agents, and SAFe practitioners to confidently navigate the ethical, legal, and operational risks of AI without slowing innovation.

Why Take This Course?

The principles of Responsible AI

Frameworks to guide ethical decision-making

How to embed Responsible AI into your SAFe implementation

Real-world use cases from industries embracing AI responsibly

Who Should Attend?

- Executives and Leaders guiding digital transformations
- RTEs, SPCs, and LPM leaders embedding AI into SAFe
- Product Managers & Architects ensuring safe, scalable AI solutions
- Ethics, Compliance & Risk Officers shaping AI governance models

Course Format

- Duration: 1 day
- Delivery: In-person or virtual
- Includes: Course workbook, digital badge, and completion certificate
- Prerequisites: Familiarity with SAFe is recommended

Join the movement toward Responsible AI at scale—because how we build AI is just as important as what we build.
