

Capabilities Statement

COMPANY OVERVIEW

Mile High Medical Supplies LLC, doing business as Delta Medical Devices, is a U.S.-based manufacturer of single-use, non-sterile, Class I anesthesia masks produced entirely in the United States.

We specialize in precision injection and blow molding of medical-grade PVC products engineered to improve patient safety and supply chain reliability. Our anesthesia masks are phthalate-free and latex-free, reducing patient exposure risks while ensuring consistent, high-quality performance for hospitals, surgical centers, distributors, and government healthcare agencies.

Delta Medical Devices delivers safe materials, domestic manufacturing stability, and margin-protective sourcing solutions without exposure to tariffs or international supply volatility.

CORE COMPETENCIES

- Manufacturing of single-use, non-sterile Class I anesthesia masks – sizes 0-6 (neonatal to Adult XL)
- Phthalate-free and latex-free medical-grade PVC production
- Precision injection molding & blow molding (in-house)
- Domestic production & fulfillment (Made in USA)
- Private label and distributor partnerships
- Rapid, scalable production runs up to 100,000 masks per month – all sizes

DIFFERENTIATORS

Safer Materials

Manufactured without phthalates and without latex, supporting reduced exposure concerns and eliminating latex allergy risk.

100% U.S. Manufacturing

All molding, assembly, and fulfillment operations are performed domestically. No offshore production. No tariff-driven pricing volatility.

Supply Chain Stability

Domestic sourcing reduces geopolitical risk, freight disruption, and extended lead times common in imported medical consumables.

Margin Protection for Distributors

Tariff-free pricing stability supports predictable cost structures and improved gross margin planning.

Operational Control

All manufacturing processes (injection molding and blow molding) are performed in-house, ensuring quality oversight and production accountability.

MANUFACTURING CAPABILITIES

- Injection molding (medical-grade PVC)
- Blow molding
- Quality inspection and lot traceability
- Controlled production environments
- Scalable capacity to meet commercial and government demand

NAICS CODES

- 339113 – Surgical Appliance and Supplies Manufacturing
- 326199 – All Other Plastics Product Manufacturing

PRODUCT CLASSIFICATION

FDA Class I Medical Device
Non-sterile, single-use anesthesia masks
Non-invasive respiratory accessory

PAST PERFORMANCE

Delta Medical Devices supports healthcare providers and medical distributors seeking safer material alternatives and domestic sourcing solutions. Our leadership team brings extensive manufacturing, quality control, and supply chain management expertise to every production run.

Detailed references and performance documentation available upon request.
