

Ferulic Acid Serum

22853

Phase	%	Tradename	INCI	Supplier	Function
A	74.0	ZEMEA	Propanediol	CovationBIO	Humectant
A	25.0	Dermsoft Pentiol Eco	Pentylene Glycol	Evonik	Solvent
A	1.0	MacDerma FA	Ferulic Acid	McKinley Resources	Bioactive

Ingredients: Propanediol, Pentylene Glycol, Ferulic Acid

Procedure

1. Mix A until uniform and clear

Distinctives

- ✚ This crystal-clear anhydrous formulation is an optimized blend of moisturizing ZEMEA and Pentylene Glycol for maximum solubility and delivery of Ferulic Acid
- ✚ Using a nonvolatile vehicle as this for such water-soluble bioactives as Ferulic Acid affords greater time for the bioactive to deliver to the skin
