

Anhydrous Self-Tanner with DHA

ACTS 22944

WHAT AM I?

A lightweight, non-greasy self-tanning solution with DHA that leaves skin with a bronze, radiant appearance. This serum was formulated with efficacy using Zemea® to enhance delivery of DHA into the skin.

FORMULA

PHASE	%	TRADE NAME	INCI	SUPPLIER	FUNCTION
A	85.0	Zemea®	Propanediol		Humectant
B	15.0	iActive DHA	Dihydroxyacetone		Active

PROCEDURE

1. Mix the ingredients using a propeller stirring until uniform.

FORMULATING FOR EFFICACY

This anhydrous serum was formulated using the FFE (Formulating For Efficacy) software. The software helps identify the proper emollient(s) to use to not only ensure that the active ingredient is fully dissolved, but to optimize delivery of the active into the skin by providing a driving force.

INGREDIENTS

Propanediol, Dihydroxyacetone

WHY AM I SPECIAL?

This self-tanner was formulated using the Formulating For Efficacy software to enhance delivery of DHA into the skin.
