

GlycoGlow Resurfacing Serum

25833

Phase	%	Tradename	INCI	Supplier	Function
A	79.2	Water	Water		Solvent
B	2.4	TEXTURLUX 'ICB3000D'	Maltodextrin	Primient	Gel texture improver
C	5.9	ZEMEA	Propanediol	CovationBio PDO LLC	Moisturizer and more
C	1.8	AquaVITA 95	Niacinamide, Polylysine	Sharon Personal Care	Preservative, brightening
C	0.6	Solagum GM	Glucomannan	Seppic	Gelling agent
C	8.3	GLYPURE 70	Glycolic Acid, Water	PureTech Scientific	Skin smoothing, brightening
D	1.8	SOLESPHERE NP-100	Silica	AGC	Pore minimizing, polishing

Ingredients: Water, Glycolic Acid, Propanediol Maltodextrin, Silica, Niacinamide, Polylysine, Glucomannan

Procedure

1. Add B to A with round bladed impeller stirring until dissolved
2. Premix C then add to A/B with slow round bladed impeller stirring until uniform clear gel is formed
3. Increase speed of stirring until everything is well dispersed
4. Add D to A/B/C until smooth

Distinctives

- ✚ Brightening multipurpose serum that enhances skin texture, delivering hydration, skin brightening, and pore minimization
- ✚ ZEMEA Propanediol provides 3-way moisturization and serves as the 'emollient' in the formulation
- ✚ Glypure 70 Glycolic Acid gently smooths skin and enhances radiance
- ✚ SOLESPHERE NP-100 spherical silica provides polishing and pore minimizing
