

What is on DEREK'S DESK (DSD) Today?

This item has been on my desk for many years. In fact, this idea came to me in full force in April 2006 shortly after the Creation Function in Nov. 2005. This is a First Principle of the Creation Function (CF).

I am sure many will agree that my material is not the easiest to understand, and I know this more than anyone--This DsD will be the hardest to understand. Read it, and let it filter in for a while and with time you will be able to see it.

Another Example of the Common Numerical Themes in the Bible

Last issue I showed an amazing connection between Noah's Ark, Solomon's Molten Sea, The Flying Roll, and Woman in the Ephah, and the Periodic Table of the Elements (PTOE). Today I bring you the The Antediluvian Earth, which is the Earth that existed before the Great Flood of Genesis 6.

this issue:

Antediluvian Earth

Pre-Flood Earth: What the Bible Says... **P.1**

...And What the Bible Does Not Say **P.2**

OutFront: Earth "A Hot Dense State?" **P.3**

Pre-Flood (PF) Earth: What the Bible Says...

Why is This Important?

Check Matthew 24:37. Jesus said on the Sermon on the Mount that right before the Lord comes back things will resemble Noah's time. *So, I will highlight similarities to today in italics.*

No Rain, No Rainbow:

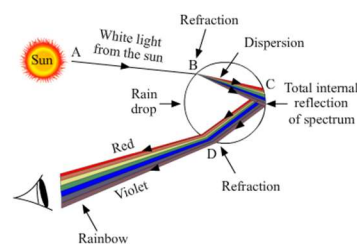

For some reason, people can easily accept that there was no rain, and thus no rainbow. An Earth with no rain is a curiosity to me, but not nearly as much as the absence of the prismatic effect on light rays. No light spectra means that the energy from the Great Light was profoundly different than today's. No discrete wavelengths of light means we cannot apply our modern understanding of physics. *Today, air pollution makes rainbow-forming more difficult because of smaller water droplet size.*

Animals Were Not Food

PF there was no such thing as eating animals. You will read later how metabolism did not exist PF, so Noah did not have the means to digest an animal if he wanted to, Today, *we are moving away from eating animals.*

Universal Speech:

We know from the Tower of Babel that there was one language, one speech. This gave humans a very creative power with their words. Unfortunately, it also gave a very destructive power if the speech was violent. *Today, we have the internet where violent speech divides friends and family and even crosses borders.*

No Planets Except Earth:

The Bible only mentions the creation of Earth on the 3rd Day, Lights and Stars on the 4th day. No mention of planets until 2 Kings 23:5. Can we assume planets PF?

My research has discovered that the distances of Mercury, Venus, Earth, Mars and Asteroids from the Sun are directly correlated to the Creation Function.

Asteroid Belt as the Great Light and Mars as the Lesser Light?

Sound far-fetched? The time it takes light from the Sun to reach Mars and Asteroid belt: (*Scaled by 20 and 1 added to compare to CF which starts at "t=1" not "t=0"*):
Mars: 760 sec ÷ 20 + 1 → Root 39
Ast1: 1100 sec ÷ 20 + 1 → Root 56
Ast2: 1600 sec ÷ 20 + 1 → Root 81

Mars' Root 39 is at 12-o'clock high in Night 4 (see CF to 1700.xls) meaning it has perfect placement as a night light. The front of the Asteroid Belt (Ast1) starts at the beginning of Day 4, and the end at the very end of Day 4 (see DsD1).

Mercury and Venus a part of Earth before the Flood?

The time it takes light from the Sun to reach planets: (Scaled same)
Mercury: 200 sec ÷ 20 + 1 → Root 11
Venus: 360 sec ÷ 20 + 1 → Root 19
Earth: 500 sec ÷ 20 + 1 → Root 26

In DsD1 the CF Table shows that Roots 11, 19, and 26 fall under Night and Day 3, the creation of Earth.

The Diagram

The Creation Function creates a "map" of the Word of God. I call this new map "The Diagram".

The Diagram was discovered shortly after the Creation Function in 2007. Here we will see the PF Diagram. Later, during the Flood, The Diagram expands. You will see more on The Diagram in DsD 8.

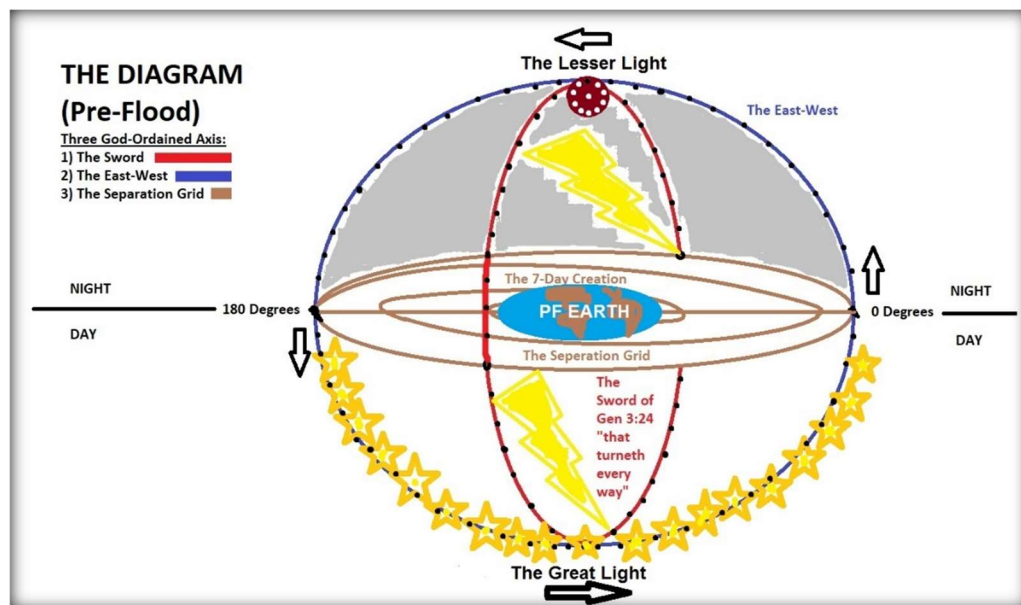

The Diagram is a living, breathing organism, that changes, but stays the same, much like the burning bush in Exodus 3.

How it works:

The Sword is also the time axis, but not time as we understand. This is PERMANENT time and may be thought of as territory. To God, time is territory. The Sword divides time according to the CF and gives occupancy for the increase of the East-West turning of Creation as Days go by.

The Separation Grid also grows as it's spiral turns. It was the Separation Grid that became the Garden of Eden. When something is planted on the Sep Grid, it grows in a spiral fashion, just like we see everything grow today. The Separation Grid also divides (like a cell) and multiplies into the new SCOPE occupancies developed along the E-W axis.

Night is shown on top, because Jewish Days begin at Night then proceed into Day. The Lesser Light is shown in its Night 4.5 position, exactly at 90° as its CF root 39 position. When Great Light rotates completely overhead, it will be like a Golden Corona over the Earth. Examples in nature to help visualize this would be the solar eclipse and the rings of Saturn.

...AND WHAT THE BIBLE DOES NOT SAY.

A critical read of the Creation Account in Genesis reveals that many things we assumed were true before the Flood were not spoken of until after the Flood.

No "Drinking" Water:

The drinking of water is not mentioned in the Bible until Gen. 21:15 after the Flood. This is very "tough to swallow", but I do present evidence that this could be true.

Noah was not told to get water for the animals, just food. Another good example is how the Ark is a type and shadow of Christ. It's possible that Christ went 40 days without food or water during His wilderness journey.

In Matt. 24:38, Christ said that they were "eating and drinking, marrying and giving in marriage..." The way He phrases this (as eating good, drinking bad, marriage good, giving in marriage bad) I do not believe they were drinking water.

And today drinking water is a huge challenge for billions of people on this planet.

No Combustion, Metabolism:

This next idea dove-tails with the previous "no drinking water" idea. Water is a huge part of many chemical processes, especially the combustion process which creates fire. Chemistry is a process of change. In Noah's time, there was no chemistry, i.e. nothing "changed from one thing into another".

Living things were added to the pre-Flood earth using the spiral-growth action of the Creation Function, much like we grow today in a spiral fashion, the whole Earth grew together spirally. The whole Earth was as one body before the Flood.

The first chemical reactions in the Bible occurred after the Flood. The first thing that Noah did was build a fire, then have a drink! Noah built an altar and began making wine, a chemical process utilizing fermentation.

Today we are trying to reduce the burning of fossil fuels. We are moving away from chemicals to more organic means of sustenance.

No "North-South" direction:

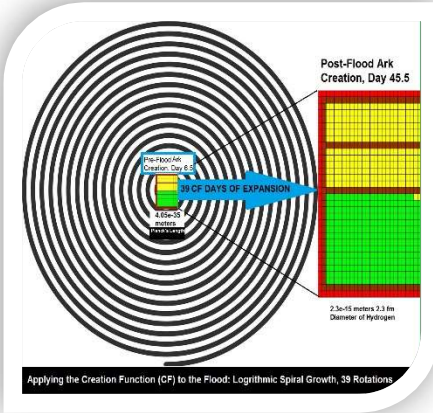

This area was protected by the "Sword That Turned Every Way". Everything existed with an angular address on the E-W grid (Scope Angle see DsD1). Much the same as files on a computer.

Today, the North and South Poles are melting, creating atmospheric instability, and changes in the distribution of water creating more flooding.

No distance, It's a Small World:

There were no cubits mentioned in the Bible until Gen. 6. Nothing was weighed or measured until the ark. Prov. 11:1 says everything has a precise weight as God intended. The Diagram section to the right shows how things exist without size or distance but remain separate and unique. Remember that the Ark was made to save the Earth, by containing a copy of it, including its history. There were 1656 years before the Flood. Compare to the Ark Frame at 1664 cubital elements, one for each year and 8 of Noah's Family (see DsD4).

OutFront: Earth “A Hot Dense State?”

The Big Bang is taught to be the explanation of Origins. But no one can say what order existed before this event. This paper suggests that a tiny, dense PF Earth was destroyed by a universal particle Flood, later to be expanded and reformed into the Cosmos we see today.

We Obtain the Diameter of the Hydrogen Nucleus:

After the Earth was destroyed by the Particle Flood, it was expanded 40 Days, as we count days using the CF. In DsD4 we establish that the Ark is a model for the Atom. Since the Ark, as an atom, was lifted and expanded by “waters” particles for 40 CF Days, we can use the CF with Planck’s length to predict a size of the expanded structure.

If you again refer to Noah’s Ark’s page, we see that the ark was lifted when the waters reached its 15-cubit waterline at ROOT = 365. This falls near the end of CF Night 6 (in other words Day 6.5). The Flood acted upon the ark 40 CF Days, 39 of which are “lifting” days, giving us a location of Day 45.5. Using Planck’s Length (4.05e-35 meters non-reduced) we can use the exponential aspect of the CF to calculate an expanded length:

Typing in $4.05e-35 * \exp(45.5)$ on the scientific calculator app on my smartphone, I obtain 2.3e-15 meters or 2.3 fm. *The accepted estimated diameter of the hydrogen nucleus is 2.4 fm. The 2014 CODATA recommended charge mass value is 1.8 fm.*

We Obtain the Atomic Mass Unit (AMU):

We said that the PF Earth was “hot” energetic by its smallness. Using Planck’s Constant (h) we can calculate the energy of a light particle (photon) from its frequency (v). And from Einstein and Planck we can calculate a mass from the energy using $E=mc^2$.

Referring to my Noah’s Ark page on my website, we see that the Ark is lifted and weighed at its waterline at ROOT 365 (Archimedes’ Principle). What is the energy of a photon of 365 Planck’s Lengths? Using $E=hv$ or $E=hc/\lambda$ from above, we get $E = 8.3825e25$ eV

And what mass can be derived from this energy? Using $E=mc^2$ we get $m = 932.9$ MeV/c². *The observed mass of 1 AMU is 931.5 MeV/c².*

Original Hot Dense Earth:

Planck’s Length is the smallest length anything can be to participate in The Standard Model of Physics:

If we assign PF Creation, Earth and its CF root values Planck’s Length each, we will have a tiny, but highly energetic, orderly structure, like the top graph in DsD3, with its 4 Days. The 4 days would be Light, Waters, Earth, and Cosmos. If we perturb this system at root 19 as DsD3 suggests, it will upset the order and the result will look like that bottom graph in DsD3, where Day 3 is split and flipped 180°. This split and flip occurs where I show Venus is today. *It is interesting to note that Venus is the only planet that rotates (retrograde) in the opposite direction that Earth rotates.*

EYE ON IT

The Solar Eclipse & Blood Moon

The Year 2017 featured both spectacular astronomical phenomena that the Bible spoke of in Joel 2:31, Acts 2:20, and Rev. 6:12. Christ preached that one day things will appear as they did in Noah’s time. A solar eclipse with its coronal ring appearing like The Great Light and the lunar eclipse being reddish like The Lesser, it got me re-thinking Antediluvian reality.

Evolution’s Regression Test

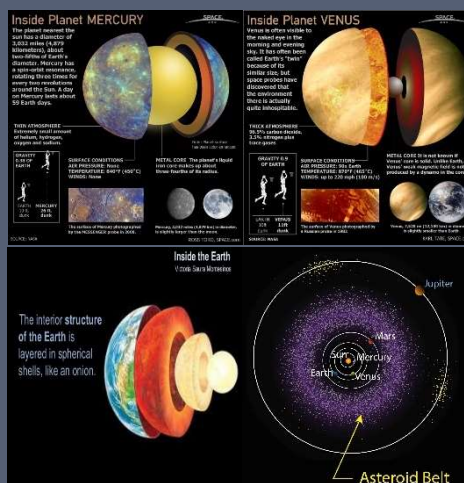

Produced by Doug Sharp and Rich Geer of Revolution Against Evolution (RAE). A regression test is a computer science term for error-checking an application after it has been modified. We discuss how evolution made changes to Earth without checking to see if any other organisms were affected.

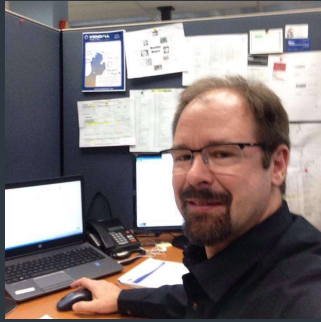

This Issue’s Q&A in New Creation Research

Q1: How Could Mercury and Venus be Part of Earth

Q2: How can the Asteroid Belt be the Great Light?

A1: We know that the Post-Flood Earth has inner parts. A solid core of a metallic mixture, a molten core of iron, a mantle and a crust. The CF simply gives a map of inner PF Earth. You can think of what was to be Mercury and Venus as the inner PF Earth with its functional layers. **A2:** The correlation of the Asteroid belt with the CF beginning and end of Day 4 is too profound to ignore. One Astronomical unit (AU) is the distance between the Sun and the Earth. The size of the asteroid belt is also interesting: 1AU wide and 1 AU high. Also remember the Metal Statue of DsD3. It had a crown on its head at Root 79. The statue was hit in the foot by a Stone at Root 19 and it broke apart onto the floor into pieces, the crowned head of Gold breaking the most--falling from the greatest height. The Asteroid Belt has billions of pieces.

Who is Derek?

Derek Marshall of East Lansing, MI is an electrical engineer who holds a bachelor's degree in Physics from Michigan State University. An inventor and former Marine, Derek discovered the Creation Function in 2005 and has applied it to many of the Bible's more difficult topics as well as questions in Modern Physics and Chemistry.

Upcoming Articles

- **Derek's Desk Issue 7: The Flood: Wetting the Earth**

There was a universal particle flood and a literal, global water flood. The particle flood portion is commonly referred to as "The Big Bang" and has been mistaken for Origins. We apply the CF to the Flood with more detail.

- **Derek's Desk Issue 8: The Flood: Drying the Earth**

There was a drying process when Earth was reborn, and reformed. It is our Modern Cosmology, the Matter, Space, and Time we live in today.

- **Derek's Desk Issue 9: The Higg's Boson: a.k.a. "The God Particle"**

With the information about the Flood from DsD 6,7, and 8----What is there to know about the Higg's Boson? Can we use the Creation Function?
