The Rapture

Gathering and Unification: Common Themes **P.1**

The Rapture and The Diagram **P.2**

OutFront: The Tree Model of the Rapture **P.3**

Upcoming Derek's Desk Issues **P.4**

What is on DEREK'S DESK (DSD) Today?

Now that we have a completed Diagram, we can begin to apply the Creation Function (CF) to try to understand the concept of "The Rapture".

Another Example of the Common Numerical Themes in the Bible

Last issue I released brand new findings that the dinosaurs may have come from small animals and birds that excreted from the Ark before Noah released them. Also, I gave evidence that the Geological Time Scale is a misinterpretation of what we see around us. Today, I release more new findings that shed some light on the controversial subject of the Rapture and how it must occur before the Tribulation and the Anti-Christ arrive.

Gathering and Unification: Common Themes

Gathering and Unifying is a Common Theme in the Bible.

"I am the Good Shephard" Christ reminds us in John 10 in the parable. There is an abundance of information in this passage in regards to Christ's intentions and interaction with the Church. We focus here in how He is gathering us together, and protecting us; and ultimately dying for us to become our portal to occupy 'greener pastures'. A swap occurs, Him for us.

Noah's Ark: The First Gathering and Unification of the Body of Christ.

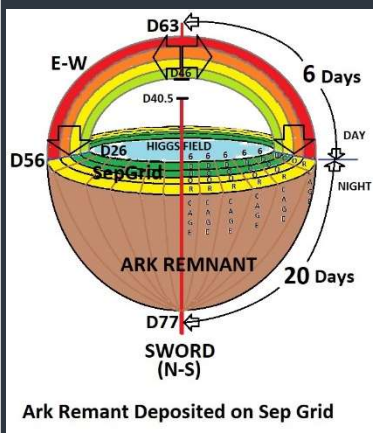

Noah's Ark is the first major gathering and unifying exercise in the Bible found in Genesis chapter 6-9. It is very detailed and descriptive, giving numbers, times and means. Virtually all of Creation is gathered into one place and encapsulated in the Ark for 47 CF Days. A substantial amount of people, food and animals 'disappear' from the Earth. It is such a substantial loss to the Earth, that Paul said of Noah in Heb 11:7 that "he condemned the world...". A unified Ark lands back on a greatly expanded Earth for the purposes of occupying and subduing the same. The redistributed contents of the Ark are released by God to enter the Earth.

Another Example: The Exodus.

In Exodus, the Israelites were enslaved to the Egyptians. An Israelite child is embedded within the Pharaoh's own family, only to emerge as the leader of Israel, as God was with him. God gives Moses instructions on how to unify and free the people and bring them to a better place. During the 10th and final plague, the first born of all of Egypt was killed. Israel 'disappears' with much of the gold, silver and material riches of Egypt which is used to build the Tabernacle, another mobile temple. They embark on a 40-year journey to get to the 'promised land' they are to occupy.

Pentecost: Acts 2, First Gathering and Release of the Church.

Fifty-Three days after the Crucifixion when Christ releases the Holy Spirit, who reappears to meet with a select group of "about 120" of Christ's best followers and pupils. They 'disappeared' into the Upper Room, and "...they were all with one accord in one place...". Note that the upper deck of a Half Ark Frame has room for 144, or a distribution of 12 groups of 12. Cloven (divided) tongues "sat" on each of them and they were released to teach the World about Christ.

The Diagram

We see that demarcation points established during the Flood also correspond to the Rapture.

The Diagram has 3 complete God-ordained dimensions, all very large logarithmic spirals: The E-W, N-S, and SepGrid. Review DsD7, DsD8, DsD9 for more on The Diagram.

What is important here today is that there are special points on the Diagram established at Creation and the Flood that are meaningful in the physical and spiritual World. It is a new discovery that these points are also shared by the concept of The Rapture. The following is an overview of these special points from the Day 1 center of the Diagram out:

Day 3: Aka ROOT 19 where the stone hits the Daniel image on the feet. This becomes a mountain (or a stone) that fills the whole Earth. DsD1, DsD3

Day 40-46: The Wilderness. Corresponds to Day 1-6 of the Original Creation now destroyed and dried by God.

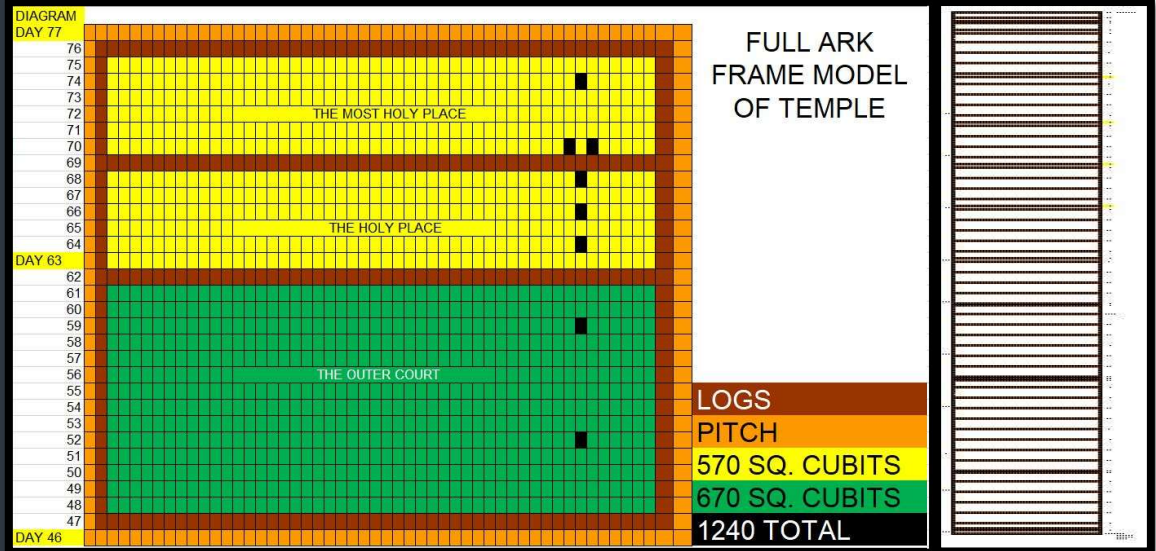

Day 46/47: The "mountain that filled the Earth" is where the Ark landed after 40 Days. DsD7

Day 56/57: The top of the SepGrid established by the Ark Remnant imprinting itself on the Earth. Last Drying Phase, 57 Days. DsD9

Day 63/64: The Ark door and waterline. DsD7

Day 77: The top of the Ark after it lands. The Ark Window. DsD8

Day 110: This comes from the first 150 Days of the Flood after the initial 40 N-S. These 110 days the Ark "went upon the waters". This established 47 Days SepGrid and 63 Days E-W. Border of Heaven.

THE RAPTURE AND THE DIAGRAM

The Rapture...What's That?

In 1 Cor. 15:51-58, Paul spoke of an event that occurs "in a moment, in the twinkling of an eye" when Christ's followers will meet Him in the air. The Greek translation for "moment" is "atomos" our word for "atom". Since the diagram above is a nuclear model DsD4 we are in this special configuration when the Rapture occurs. Also read 1 Thes. 4:16-17.

Pre-trib, Mid-Trib, Post-trib...?

There are 3 opinions of when the Rapture occurs relative to the Great Tribulation. One idea is before (Pre-Trib, which is the position of NCR). Some believe in the middle, and others at the end. My findings show that Satan must be kicked out of Heaven before the Rapture can occur and that cannot happen until Satan can occupy the Temples on Earth. So, a "swap" occurs, Satan for us.

Must Be Born of Water and Of Blood to See the Kingdom of God.

From the 47 NS Days of the Flood we are born of water. From the Blood of Christ, we are reborn and this occurs at the Door at NS Day 63. These two values convolve to get us to Day 110.

The Full Ark Frame is a model of our temple (the human body) and the Jewish Tabernacle. The Creation Function and The Diagram shows how the Rapture works "by the numbers". We see that the Rapture depends upon who is where, when.

Satan Kicked out of Heaven.

We read in Job that Satan has access to God in Heaven. Satan also has elevated himself above God. The Beast takes up space in Heaven (see DsD11) and that is a problem. Rev. 12:9, Satan is kicked out of Heaven by Michael, making room for us.

The 144,000 Witnesses is Prophesied by the Ark.

There are around 66 days of Rest on the Jewish calendar, and the Ark has a similar number of walls for cargo. The Ark is also calendar-related with 365 frames worth of wood for walls. This gives 66 full walls and 234 spaces for cargo. Using 616 particles per frame capacity, $234 * 616$ is 144,144 particles capacity. I believe this is related to the 144,000 witnesses. More on this in DsD15.

The First 1260-Day Period of the Tribulation Prophesied by the Ark.

Each of us has a capacity of 1240 in our personal temples. The black marks in the frame above represents the furniture in the Temple. Rapture is when the "stuff" inside our temples is evacuated, leaving the furniture. Since this actually happens in the Ark Remnant on the SepGrid, a path of 20 cubits (see Page 1 diagram where it says "20 Days") is needed to Rapture our "stuff" from Day 57 up to Day 77 where the Sword (Jesus) is waiting. According to Daniel, The Tribulation Period is 7 Years divided into 2 periods of 1260 Days each, exactly 3.5 Years. Giving a day per cubit, it will take those "left behind" 1260 days to fully occupy the empty temple left behind by Raptured Christians. This is an amazing finding, but gets more so in DsD15.

The 398 ROOT particles in Night 7 shown by the Ark Walls.

With 66 full walls this makes 132 walls for cages per floor. The Ark has 3 floors giving 396 cages. Referring to DsD1 CF Table, Night 7 has 398 ROOT particles, implying that the animals were at Rest in the cages.

OutFront: The Tree Model of the Rapture

The “tree” makes many appearances in the Bible, and I have used it to model the atom. Here I show how it also can be used to model the Rapture.

The Leaf Already Given as the Electron in the Tree Model.

Recall from DsD9 I mention that the leaf on a tree represents the electron in the Tree Model, and the branch represents the proton. The electron is negatively charged while the proton is positively charged. From DsD9, charge is the ratio of logs to water and pitch to blood. The leaf receives water from the branch and returns sap (tree blood). They have exactly opposite flows and therefore a net charge of zero.

The Leaf is a Type and Shadow of Christ.

In Mark 8:24, Christ is mid-process of healing a blind man. He sees “men as trees walking...”, confirming that the tree is an appropriate model for humans. During the Flood, the Dove returns with a leaf in its mouth signifying the Rest in Christ Jesus found. In John 2, Jesus himself during his first miracle facilitated by woman demonstrated the water to wine action similar to the leaf water to sap process.

Pigmentation in a Leaf: Green to Red Color Change.

The leaf color change signifies the changing of seasons and is a warning that the Winter deathly cold is coming. The pigmentation of leaves is due to an interplay between two chemicals, chlorophyll (green) and carotenoids. Carotenoids are yellow and orange and are always present in the leaf. However, as the seasons begin to change, chlorophyll production ceases and the yellow and orange pigments dominate. Jesus taught to observe the seasons to know when He is coming. The red sky and moon signs we see today in the sky are examples. As we get closer to the rapture, we will begin to see more reds in the sky from *aurora borealis*, dust storms, pollution and lunar eclipses.

Chlorophyll Leaves Leaf and is Combined to Grow Tree.

In a deciduous tree, when the time is right, the chlorophyll “disappears” from the leaf and quickly flows down the branch to be later processed into sugars, and most importantly, combined into the cellulosic materials used to construct the next year’s tree growth, just like building a new temple. Separate particles (water, minerals) come together into one high place (the Leaf). They are instructed by God directly (Light). They are combined and reconfigured (chlorophyll), to be led away (Branch) to occupy new and fertile territory (new growth). What is left behind is condemned and falls to the ground to die and be dried, divided and ground into the darkness of the Earth’s soil to become food for life.

FIBONACCI CORNER

TABLE 1. Examples of Plants with Alternate Leaf Spacing

Fraction of a circle between adjacent leaves on a stem	Angle between adjacent leaves	Number of leaves before one occurs directly above a lower leaf	Examples
1/2	180°	2	elm, lime, linden, mulberry
2/5	144°	5	apple, apricot, cherry, holly, oak, plum
5/13	138.5°	13	almond, white pine, willow
3/8	135°	8	pear, poplar, rose, sunflower, sycamore
1/3	120°	3	alder, beech, birch, blackberry, hazel

The following Math Matters column by CRS president Dr. Don DeYoung appeared in Creation Matters Vol. 23, No. 2, March/April 2018.

“Phyllotaxis, also called phyllotaxy, describes the arrangement of leaves along the stems of plants and tree branches. Leaves variously appear as 180° opposites at the same locations along a stem, as whorls on some cacti, or in a spiral distribution along the stem. It is this latter alternate spacing which is of interest here.

Such leaves on a vertical stem are typically offset at a constant angle from the leaf just below. Vegetation shows considerable variation in this alternate leaf spacing. Some stems grow leaves on opposite sides along the spiral, designated by the ratio 1/2, with one-half of a full turn between leaves.

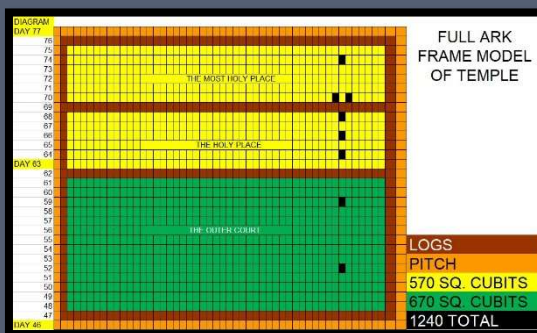

Other common fractions of a circle between adjacent leaves are shown in Table 1. Interestingly, each fraction consists of Fibonacci numbers. Readers may recall that the Fibonacci sequence follows from the pattern of adding together the two preceding numbers: 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89, 144, ... “

This article is independent verification of my Creation Function work because it also develops angles (like DsD1 SCOPE angles) from Fibonacci numbers (like DsD1 ROOT numbers). Also recall from DsD1 that the Creation Function produces the Fibonacci Sequence.

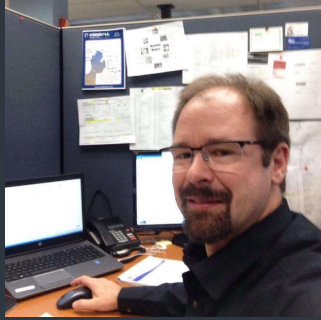

This Issue’s Q&A in New Creation Research

Q: We have seen 616 and 624 both referenced as the capacity of the half-ark frame. Which is it?

A: To be honest, this has dogged me until yesterday. I stuck with it because both values have purpose and are valid. The answer is that that the Temple had 7 pieces of furniture inside. The Ark of the Covenant, The Veil, The Braed Table, Incense Altar, Candle, Laver, and Altar. Since the veil was torn in half, when Christ died, the Veil became two pieces, for 8 total. For the Ark, you have 8 people inside. Keeping with the “why half” theme, the Half-Ark one side will have a full 624 cubital capacity. The other side will have only 616 cubital capacity. The furniture stays because the antichrist must sit in the Temple (2 Thes. 2:4)

So both 616 and 624 are correct and have their individual places. The 616 is the most important because it ties the Creation Function, the Flood and the Tribulation together numerically here, and in DsD15, The Mark of the Beast.

Who is Derek?

Derek Marshall of East Lansing, MI is an electrical engineer who holds a bachelor's degree in Physics from Michigan State University. An inventor and former Marine, Derek discovered the Creation Function in 2005 and has applied it to many of the Bible's more difficult topics as well as questions in Modern Physics and Chemistry.

Upcoming Articles

- **Derek's Desk Issue 14: UFO's and ET in the Bible**

Are there UFO's in the Bible? What about Extra-Terrestrial and Celestial Beings? You may be very surprised at the possibilities.

- **Derek's Desk Issue 15: The Antichrist and the Mark of the Beast**

What can the Creation Function and The Diagram tell us about the Antichrist. Can we fulfill the Revelation 13:18 challenge to count the number of the Beast?

- **Derek's Desk Issue 16: Dark Matter**

I expound greatly upon the Tree Model of the Atom, to show what Dark Matter could be. As of this writing, no one knows what it is and I believe I will be able to actually make some predictions using the Creation Function and the Diagram.
