The finished product can be any size. It just needs to have 1/8" of color all the way around (if you want color to go all the way to the edge of the product.) You can put 2 or more smaller pieces on one sheet as long as they all have 1/8" all the way around. Also - no wording should be any closer to the finished edge than 1/8" all the way around. NO original art should ever be any closer to the edge of the page than 1/8".
