

AUSPHALT™

Ausphalt™ is a propriety design of asphalt which contain products that offer greater resilience than normal asphalt. Designed specifically to meet current Vic Roads standards and to meet our obligation as environmentally aware citizens.

Rich River Asphalt use locally sourced products at our onsite plant.

Ausphalt mixes include:

- Crumb Rubber from end-of-life tyres
- Waste glass destined for landfill
- Reclaimed asphalt pavement (RAP) from end of life roads

On average a one–Kilometer stretch of road paved with Asphalt™ will divert from landfill:

approx. 212,000 Glass
Bottes

approx. 113 Tonnes of Recycled
Asphalt Pavement (RAP)

approx. 800 end of
life car tyres
