

RICH RIVER ASPHALT ENVIRONMENTAL MANAGEMENT POLICY

Rich River Asphalt is an Independent asphalt manufacturer and Spray Seal contractor servicing northern Victoria and southern NSW. Our bituminous products are manufactured with materials sourced by local suppliers. Rich River Asphalt aims to provide local businesses and authorities with a range of quality Asphalt and bituminous products. Our company provides contracting services to State and Local Government authorities, Developers and Contractors within the local region.

Rich River Asphalt's vision is to be a market leader promoting environmentally sustainable practices by supporting our customers and guiding our suppliers to achieve excellence in environmental practices and management.

Rich River Asphalt is committed to protect the environment, prevent pollution and will continuously develop, maintain and improve our environmental management system in line with best practice across our operations, in order to:

- Provide the appropriate resources to manage, implement and control our environmental activities and minimise our environmental footprint.
- Comply with all relevant environmental legislation and applicable standards, codes of practice and guidelines.
- Ensure managers, supervisors, employees, suppliers and contractors are aware of their responsibilities as defined within the RRA Integrated Management System.
- Establish environmental objectives and targets.
- Measure monitor and report environmental performance to enable regular management review and provide for continuous improvement.

To meet these objectives we operate a certified Integrated Management System (IMS) complying with the requirements of the Environmental International Standard AS/NZS ISO 14001:2015

The company managing directors are responsible for establishing and overseeing Rich River Asphalts commitment to manage the environment in accordance with the Environmental Policies and for monitoring the performance of the company with respect of its implementation.
