UCLEAR Boomless Helmet Communications

UAP200

The Universal Accessory Pack provides an extra set of hi-fidelity speakers and wide range of mounting hardware so you can use your HBC200 series controller or PLUS series controller with a second helmet or on a pair of goggles. Mounting hardware works with most motorcycle, snowmobile, snowboard, and ski helmets.

Embedded within each speaker is UCLEAR's military proven boomless microphone and patented beam forming technology that isolates your voice and eliminates background noise so you can be heard in even the most extreme environment.

Compatible with: HBC200, HBC220 FORCE & HBC100 PLUS

ADVANCE COMMUNICATION FEATURES

Military Proven Technology Goes On the Road

The last thing you want to happen on the battlefield is be unable to communicate clearly. That means hearing and being heard no matter what's going on in the background. That's where UCLEAR's patented Adaptive Beam Forming® (ABF) Technology and Advanced DSP were born. And while the American slopes are much tamer, the same know-how that created ABF is now available for you.

UCLEAR is changing the conversation in helmet communications.

The boom is over. The microphone for today is invisible. BITwave's ABF®, "boom-free" microphone technology effectively isolates the user's voice, so there's virtually no interference from wind and background noise. What you hear is just as impressive—award-winning hi-fidelity sound that takes your music, phone calls and intercom to a level of clarity that is truly amazing.

Why You're Better Off Boomless with UCLEAR

- Patented ABF technology isolates voice
- No wind interference
- Eliminates background noise
- Clearer conversations
- Compatible with most Bluetooth devices

Other UCLEAR Products

- HBC200 & HBC220 (Speakers, Helmet Attachments, AC/USB Charger)
