Intro [2x]

Verse [4x]

I can't explain what you must think
About the way I made you feel
I cannot understand your contemplation
On the state of the condition that you made

Verse [4x]

I can't explain my fascination
About the status of your saving grace
Or the path on which you've taken
To another, person, time and place

Chorus [4x]

Nothing ever seems that easy
When there's nothing left to say
I've contemplated the stupid reasons, that you gave
For the state of the condition that you made
No explanation is what you gave

Verse [4x]

I can't explain your abject feelings
Or the callousness and hate
I can't defend your aspirations
To transcend beyond your fate
No Explanation, is what you gave

Chorus [4x]

Nothing ever seemed to please you
And now there's nothing left to say
I've contemplated your stupid reasons
For the state of the condition that you made
No explanation, is what you gave
