

## North of Phoenix

### Intro [2x]

### Verse [4x]

Desert city lights fade into a dusty haze;  
I can almost feel the City breathe  
Choking and coughing as I take my leave again  
Stretching north and stretching south;  
I'm stretching out across a concrete wall  
That doesn't seem to have a logical end

### Pre-chorus

I thought I was so strong; In this place I thought I'd never leave

### Chorus [4x]

North of Phoenix, there's a highway that (never) ends  
At a sacred place; and a sacred time

### Verse [4x]

There's been a subconscious split in this world  
A subtle crack and you know that things you once knew will never be the same again.  
Thirty miles on a road north of Phoenix with my friend  
A two-lane highway to a place where the angels fly [and people feel human again].

### Pre-chorus

Something just went wrong; In this place I thought I'd always be

### Chorus [8x]

North of Phoenix, a highway that never ends  
There's a sacred place

### Bridge [4x]

No matter how hard I try, I can't erase my time there.  
Wherever I may go, there's no escaping me  
There's times I feel like this will never end

### Chorus Out

North of Phoenix, you seem so far away  
But I know, I can always call you home
