## Quick use instruction

### 2.1 General features

This manual only provides detailed instructions for dial-up applications. Other functions are the same as those of android phones.

#### **Turn on/turn off:**

Turn on: Long press the "POWER" button for 3 seconds and the system will start up.

Turn off: Press the "POWER" button until a pop-up window appears and then choose shutdown or press the "POWER" button until the system automatically shuts down.

#### **Screen wake up:**

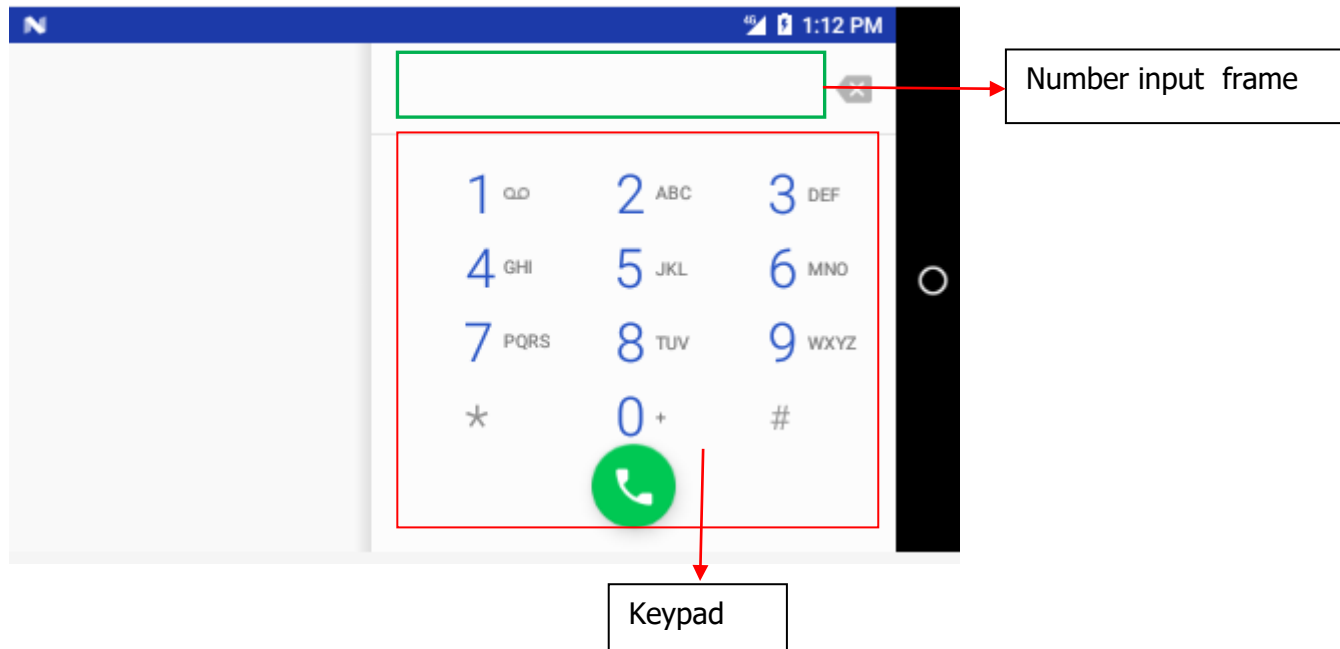

The screen automatically goes to sleep or after the screensaver. Press the "POWER" button to wake up the screen or cancel the screensaver and enter the phone app.

[Note] when the power is low, the device will continuously alarm. If not charged, the device will automatically shut down; If the device cannot be started, please first check whether the battery is powered or not, under the premise of ensuring a certain amount of power, then try to start up.

## Dial-up application

### 3.1 Introduction of telephone application

### 3.2 Start the phone application

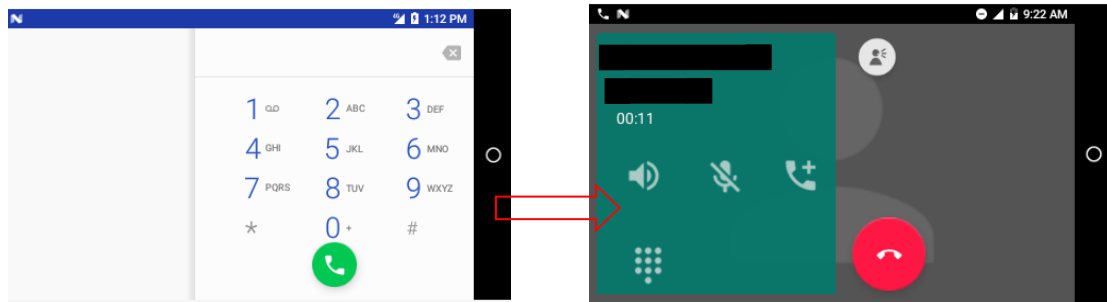

Users can access the phone APP to use relevant functions through the following ways:

- ◆ Pick up the handset;
- ◆ Press this key ;
- ◆ Click the phone icon on the desktop.

### 3.3 Making a call

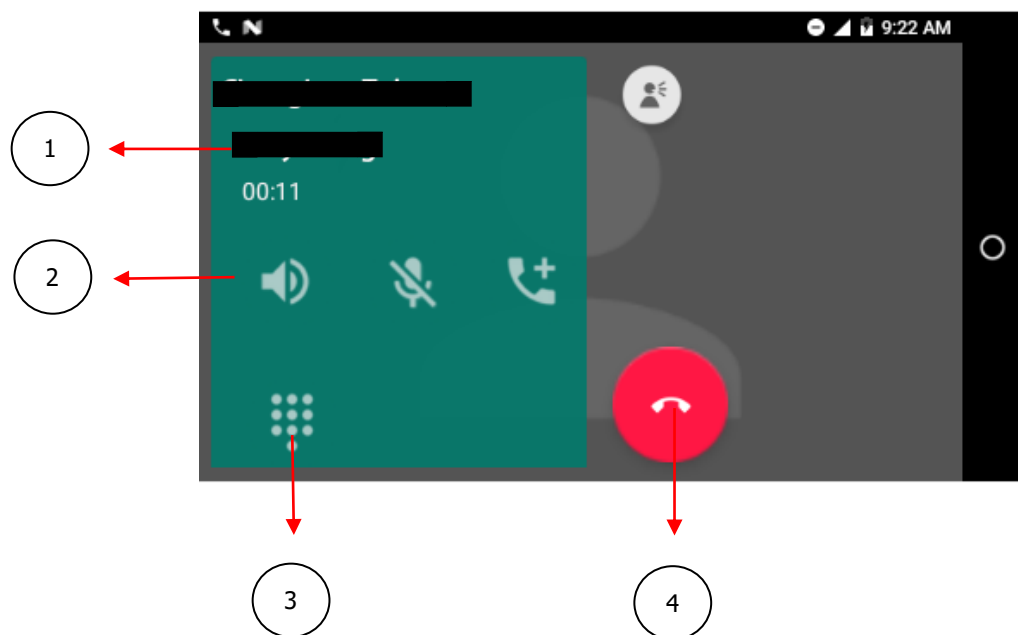

After opening the APP, it enters into the dialing interface by default. In this interface, you can input the number you need to dial in the dial-up area and click the dial icon button

 to call.

### 3.4 Interface and operation of calling process

#### Calling interface

1. Contact name
2. Hands-free handset switch button
3. Expand and close the dial-up area: Click this function key to hide and open the number keys.
4. Hang up key

### 3.4.1 Hang up

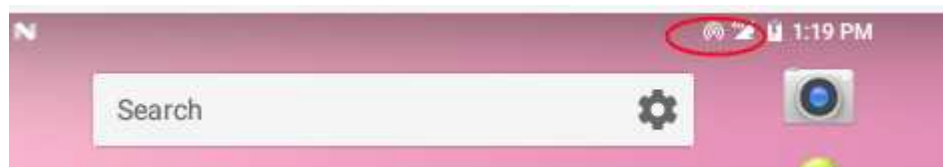

Hang up function is used to end the call, and three kinds of hang up are supported.

- Click the "hang up" button  on the dial-up interface or the call interface.
- Put down the handset in off-hook status.
- Press the hands-free key  during the calling.

### 3.5 WIFI hotspot switch:

This function only works if the device is connected to a 4G network:

Press the shortcut key  to open the WIFI hotspot mode, and the maximum number of connected devices is 9.

## Attentions

1. Please keep the machine away from strong magnetic field, which may cause damage to the device.
2. Do not let the device fall down or rub with hard objects, or it may cause the surface abrasion, battery loss, data loss or other hardware damage to the phone and then it can not boot.
3. Do not expose the phone to moisture or rain. If it is flooded or damp, it may cause failure, or even maintenance.
4. Do not use chemicals or cleaning agents to clean the device, this will damage the surface and corrode spray paint.
5. It is recommended that you do not use the earphones continuously at high volume. Please adjust the volume to the appropriate safe level and control the use time to avoid your hearing damage. If the volume is too high when using headphones, it may cause permanent hearing damage.
6. Do not shut down your computer without power when upgrading or downloading the software. Otherwise, data loss or program error may occur.
7. It is forbidden to use overload power supply, bend or squeeze the power cord with heavy objects in order to avoid causing heat and fire.
8. Do not use wet hands to plug the power supply in case of electric shock.
9. Some films, music and pictures may be copyrighted, and playing them without permission would violate copyright law.
10. Do not turn on the wireless device when it is not allowed or the use of the device may cause interference or danger.
11. All wireless devices can be subject to interference, which can affect performance.
12. Please comply with any relevant restrictions. Wireless devices can interfere with aircraft. If you use this device on the plane, please consult the airline first. Electronic devices must be used with great care during flight.
13. Do not use the equipment in the gas station. Do not use the equipment near fuels or chemicals
14. Please comply with any relevant restrictions. Please do not use the equipment in the blasting operation place.
15. Only qualified maintenance personnel can install or repair the equipment.
16. Please use original accessories and batteries. Do not use unmatched products.
17. The equipment is not waterproof, please keep it dry.
18. Back up important stored information or keep a handwritten record in case of loss.
19. When connecting to another device, read the device's user manual for detailed security instructions. Do not connect with unmatched products.

20. If the actual setting and using method of the product are inconsistent with this manual due to the loss of firmware, please use the CD-rom package with the software and instructions for upgrading the operating instructions to update the software.
