Agenda

- Managing Up Overview
- Introductions of Moderator and Guest Speaker
- Managing Up Discussion
- Open Forum (Additional Q & A)
- Thank You
- Upcoming Events/Programming

Managing Up Overview

Most professionals understand that managing up is an important element of workplace success. It's simply not enough to just keep your head down and do what you're told; instead, savvy professionals know that part of their job is figuring out how to help their boss be as successful as possible. A key part of this process is often customizing one's work style to better fit their boss' preferences and determining those preferences requires a little leg work.
