Analytical Study

TRACE Team used the success stories shown in the table below to measure and conclude facts showing the extent to which the consultant, engineer Nedal Dudin contributed to developing the model and methodology for preparing and passing the PMI® Exams with a short period of time not exceeding sixteen days.

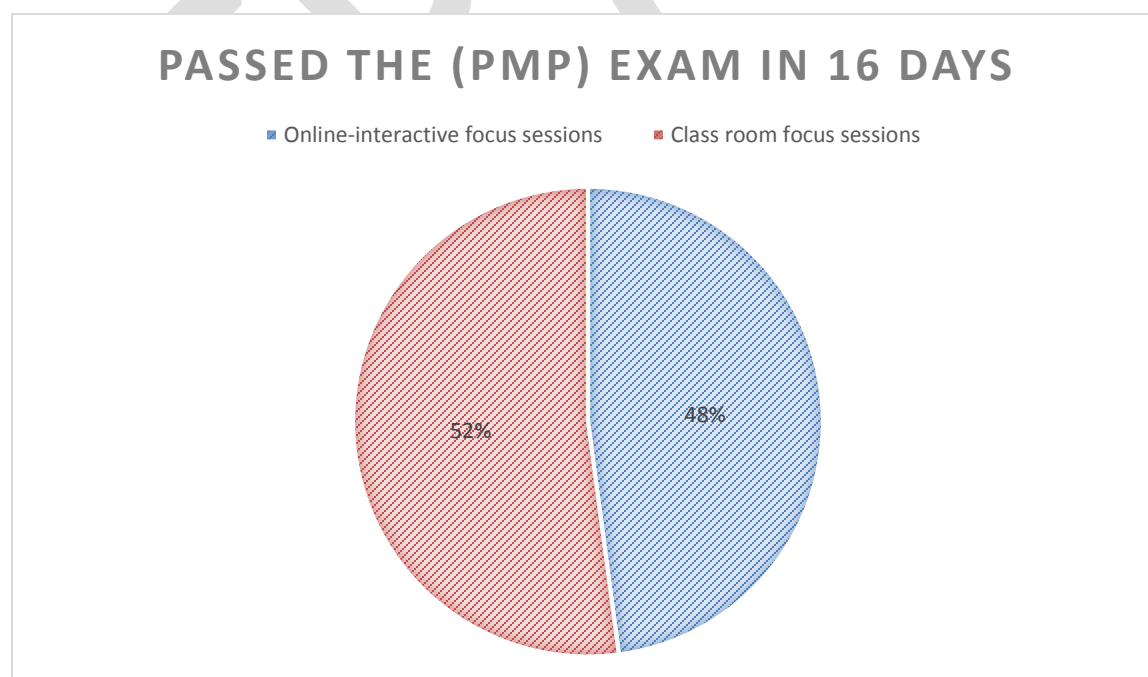

The results of the analytical study show the following facts:

Evolve the tools and techniques used in the remote focus sessions, to prepare for the PMI® Exams. As the percentage of those who obtained the (PMP®) certificate by means of distance

focus sessions technology reached (47.9%) in the year 2020

The evolution of the methodology in providing consultations during focus sessions clearly contributed to maintaining the period of time to pass the exams, which is only sixteen days.

The results of the analytical study coincide with the use of **TRACE Team** for the development of technology in the field of consulting, and the results of this success are shown in the increase in the number of successful people for this year, where every week a single success case was observed.
