

ARMOUR FIRE SOLUTIONS

INTRODUCING THE PATENTED SOLID FOAM STICK MANIFOLD. A REVOLUTION FOR PORTABLE PUMPS & FOAM!

The new Solid Foam Stick Manifold by Armour Fire Solutions provides an innovative way to deliver foam so you can be more efficient at fighting fire!

Our manifold is 100% reliable and guaranteed to work every single time. There is no mechanical or electronic equipment to plug up or break down.

- Installation is **SIMPLE AND INEXPENSIVE**. It can replace any standard discharge manifold and is compatible with any portable pump on the market.
- When properly installed there is **NO POSSIBILITY** of water tank contamination with foam, one of the most common problems on portable pump's with foam systems.
- There is **NO MAINTENANCE** besides removing any unused portion of the solid stick from the unit when done with use.
- There is **NO PRODUCT WASTE**. The stick is removed from the manifold and placed in storage to be used again when needed.
- Solid stick technology is **MORE AFFORDABLE** and cost efficient when compared to liquid foam.
- Finally, the mess, weight, high cost, and required storage area of liquid foam can be **ELIMINATED** from your operation.
