Lot G20 – WSM DOMAIN 919G

Lot G1 – WSM COWBOY 911G

Lot 48 – PAV MR BLACKHAWK G900

Welcome Cattlemen, Family and Friends!

A new year is upon us and we look forward to this time of year for many reasons. Like many others we were happy to shut the door on 2019 and start a new year. I am a “glass half full” type of person, so as I look around, I can see at least 38 good things that came out of 2019, and I hope you feel the same as you page through the catalog. We feel optimistic about 2020 – it’s going to be great!

If you know our program, you know we like bulls with performance. We have been searching for some new sires that will give us a bit more calving ease, without sacrificing performance, and we think you may like what we have found. We have bulls that will fit many programs, and we would love to visit with you if you have any questions or would like to stop by and take a look.

We have 50 top-cut commercial open Red Angus heifers to offer this year. We maintain the same guidelines in our commercial herd – we want cows that are quiet, profitable and will go out and work. A majority of our commercial cows run up in the Badlands, and when they bring back a good calf, you know they are efficient!

We are excited to have the Pavlenko Brothers join us again this year. They have a nice offering of Simmental bulls and it is fun watching their program grow.

Thank you for your interest in our program, see you sale day!
Chris, Jolyn, Kacey and Braelyn Wasem

Welcome to our second production sale, we would like to thank Chris and Jolyn for allowing us the opportunity to sell our bulls along side theirs once again. This year we are offering 10 black bulls along with three red bulls. We have a few new sire groups this year that we are excited to offer to our customers. The bulls had DNA work done through the American Simmental Association, the black bulls were tested on coat color. A homozygous black bull will throw all black calves, and a heterozygous black bull will throw close to all black calves depending on the cow herd.

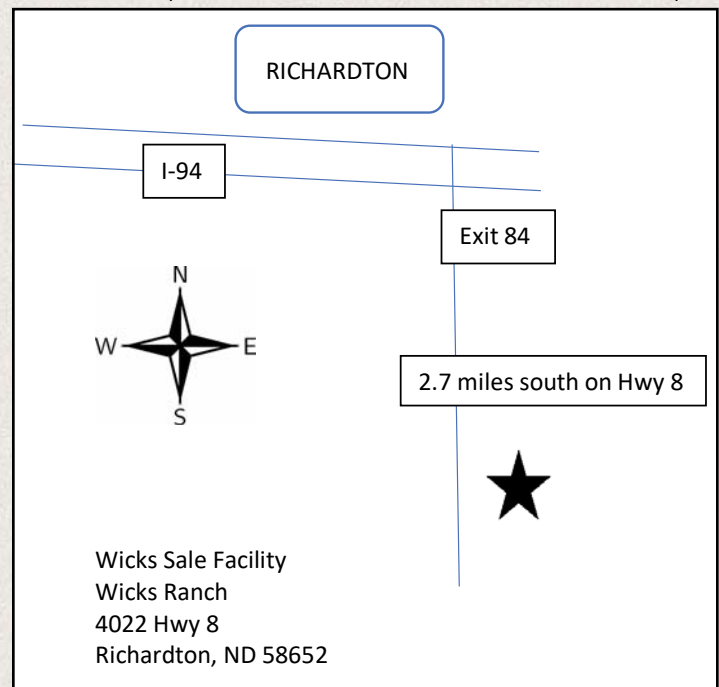

The bulls were weaned on October 5th and were started on medicated Head Start and long hay. On November 1st we switched the bulls to a corn-based bull developer from Steffan Feeds. The bulls started receiving chopped hay on December 10th. We don’t push our bulls hard because we don’t want them to fall apart after our customers receive them. After the sale the bulls will return to our place and we will continue to feed them the same way. In the middle of March, the bulls will slowly be backed off of grain. We do this to ensure longevity. The bulls will be delivered for free around the middle of April after they pass a semen test.

In the spring, the bulls received a round of Vision 7 20/20 and Vista Once SQ. In early fall and on October 5th the bulls were given two rounds of fall boosters. They were given Vision 7 Somnus and Vista Once SQ. They were poured with Ivermax when we weaned them. And have been poured with Clean-up II twice since then.

We are selling full possession of all of the bulls, but we are retaining 1/3 semen interest on all of the bulls. Pavlenko Simmentals is also reserving the right to collect 100 units of semen on any of the sale bulls for in-herd use only. This will be done at the seller’s expense and the buyer’s convenience.

If you have any questions, contact Payton at 701-495-1168.

We look forward to seeing you at the sale!
Larry, Payton and Teigan Pavlenko
