

2021/03/05

Dear Markham Tennis Club Members,

As you may or may not know, the City of Markham has been in talks with a private investor to build a bubble over MTC. This will provide our Markham tennis community with a facility where they can enjoy playing tennis year-round. We have been in constant communication with the City over the winter months trying to establish when the possible construction will begin and how it will impact our Club.

City staff is working with the successful contractor to develop a firm construction schedule. At this time, it is anticipated that the construction work will begin early spring 2021 as soon as the site condition permits construction. It is anticipated that the construction will complete by the end of September 2021. City staff is exploring any and every option available to minimize disrupting the operation of Markham Tennis Club through the 2021 tennis season. You will notice construction workers and equipment working within Reesor Park for most of the tennis season.

We wanted to share the latest details with you and will keep you posted as more details become available, ensuring 100% transparency.

The City commits to continued and open communication and to provide regular updates on progress.

We want you to know that you, our members, our MTC family, is our top priority and we are working with the City of Markham to create possible solutions to minimize disruption through the construction phase. Our only goal is to keep you happy and get you playing tennis this summer.

We thank you for your patience and look forward to your continuous support.

This communication has been written in conjunction with the City of Markham and the Board of Markham Tennis Club.
