## Painting Process

**Surface Inspection** – Before painting the Interior walls, undertake repair works for any surface imperfections - Cracks, Leakages, Undulations and Rusting from drainage pipes.

**Scraping** – Remove all loose paint, dirt, algae, salt deposits by sanding the surface.

**Berger Recommended Tool:** Express Painting Sander with Paint Scrapper attachment.

**Crack Bridging** – For filling cracks up to 5mm use Home Shield Crack Fill Paste. For wider cracks use Home Shield Advance Latex Plus as per the product usage guidelines.

**Waterproofing** – If required apply Home Shield Damp stop on the affected areas as per the product usage guidelines.

**Putty Application** – Apply 2 Coats of Bison Wall Putty with 4 – 6 hrs. of drying time. For finishing or repainting 1-2 coats of Happy Walls Acrylic Wall Putty is recommended (For enhanced waterproofing Home Shield Waterproof Putty can be used instead of Bison Wall Putty).

**Primer Coat** – Apply 1 coat of Berger Seal-O-Prime, an alkali resistant primer with sealing and priming properties, alternatively use BP Cement Primer WT Primer (an alkali resistant primer) – allow 6-8 hours of drying time between coats.

**Top Coat** – Apply 2 coats of Berger Interior Emulsion with recommended dilution ratio as finishing coat with a drying time of 6-8 hours after each coat.
