READY MIX PLASTER

This is a high-performance ready-mix cement plaster for exterior, interior and ceiling application. It is produced in a controlled environment using well-graded natural/m-sand, cement, fibers, integral waterproofing compound & other specialized polymers which provide a smooth, crack and water-resistant surface for a durable structure.

TILE INSTALLATION

Tile installation requires proper subfloor preparation to prevent water damage and to ensure a long-lasting floor. Whether it's cement board or a tile backer base, we make sure we have all the necessary materials for installation. For heavy tile like slate, we make sure the floor has the necessary reinforcements for proper installation.

Once the tile is laid and the mortar has set, we fill the grout lines. Since grout needs a few weeks to completely cure, we'll come back and apply a grout sealant; if necessary, to prevent stains.
