# Vianney

Academy of Learning

## A COMPLETE SOLUTION FOR YOUR LEARNING PROBLEMS

Each child is unique with different talents, patterns of thinking, interest and creativity. Their personal and educational needs are very prominent and they require immense support, care and encouragement. We advance each child with a holistic and a highly individualized approach.

Vianney Academy of Learning is a leading multi-speciality therapy clinic and rehabilitation centre in Kerala, established in 2015. It has started to provide remedial education for children with Learning Disabilities and Learning problems. In 2019, we formed a society named as SECWSN - (Society For The Empowerment of Children with Special Needs). The society is promoted and run by well experienced group of professionals such as Special educators, psychologist, speech language pathologist, occupational therapist and social workers. We focus on one to one as well as group education and skill development programmes.

## ST. JOHN MARIA VIANNEY OUR PATRON

St. John Maria Vianney (1786-1859) is the patron saint of all parish priests. He had to overcome various obstacles in his life including education, learning problems and speech anxiety. He was asked to leave seminary because of these reasons, but his bishops found his innocence and holiness of him and ordained him as a priest. He was serving in a remote parish of France where no other priests were willing to go. He was noted for his preaching and confessional counselling and was honoured as a model parish clergy.

## OUR MAIN OBJECTIVES

- To Identify and conduct assessment for speech and language disorders, Learning disabilities, ADHD and Autism in early childhood
- To Help those children to lead a normal life with the help of corresponding experts.
- To Give instructions and special training to the parents of those children with special needs
- To conduct studies and research on how to introduce modern theories and technologies in the education and training.
- To prepare and implement special curriculum
- To prepare and distribute teaching learning materials for children with special needs.
- To conduct National and International seminars, awareness classes and training programmes on disability.

## VISION

To serve children with special needs and their families using a process of referral, evaluation and intervention strategies to reach their full potentials and provide the best opportunities to transition between home, school, and their community

## MISSION

To promote student engagement through an innovative curriculum in a therapeutic, inclusive atmosphere and provide recreational opportunities for children with special needs to reach their potentials.

## WE ARE EMPOWERING THE CHILDREN WITH

- Learning disabilities
- Speech and language disorders
- Autism
- ADHD
- Scholastic backwardness
