- Smart electronics

Dimensions:

- Height: 2.62 m
- Width: 2.4 m
- Depth: 0.68 m

690mm 460mm 2850mm 2400mm

Charging mobile devices
Charges phones, tablets, cameras and different types of wearable devices, 24/7 via two built in cables and two USB ports, using only clean energy directly from the sun.

Social Hub
People can enjoy their free time sat on a Senergy Smart Bench, recharging mobile devices, checking local info, chatting and meeting other people.

Environmental Sensing
Using environmental sensors, it collects data such as CO_2 level, noise, humidity, pressure and temperature and sends it to the cloud.

Smart electronics & emergency
Smart electronics and built in batteries enable the Senergy Bench to work even when there is no sunshine.
Energy is stored and always available to be used in cloudy weather or at night.

Easily movable
Our Senergy Smart Bench is easily installable without any need for foundations. In that way it can be moved to another location, however it is safely fixed on ground, so that it cannot be moved by users.

Easy maintenance
Charging cables can be easily replaced in five minutes with the simple plug in system.
