Accent Designs with Interior Plaster
Create beautiful accent walls using interior plaster with a variety of textures and finishes. These finishes add depth, character, and a unique architectural style to any interior space.
Different plaster textures can be used to achieve modern, rustic, or artistic effects, making each wall a distinctive design element.

FLEXI STUCCO DECOR
Lightweight concrete panels with elegant interior stucco finishes

Custom Interior Designs
Create unique interior spaces with our lightweight concrete wall panels. Panels can be hung on the wall as easily as hanging a frame, making installation simple while adding a modern architectural element.

One Side Abstract Art Panel
Size: 1" x 48" x 48"
Finish: One-sided abstract design
Lightweight concrete panel designed for interior decorative wall installations.
Hanging hardware included.
Abstract Panels with LED light Model – \$68000

One-Sided Interior Decorative Panels
Designed for interior wall decoration, each abstract art panel is unique.
No two panels are exactly the same, making every piece a one-of-a-kind architectural element.

Create Stunning Night Highlights
Our panels can create beautiful night-time effects when combined with lighting. LED lights installed behind the panels produce a soft glow that highlights the textures and abstract patterns, transforming the wall into a striking architectural feature.
This backlighting effect enhances the depth, shadows, and artistic details of the panel, creating a modern and elegant atmosphere for both interior and decorative spaces.
Ideal for feature walls, entryways, living spaces, offices, and commercial interiors, these illuminated panels bring a unique blend of art, texture, and light to any environment.

INSTALLS IN JUST A FEW HOURS

Do It Yourself in just a few hours or find a handyman that can install for You.

All of our panels are lightweight concrete that weight less than 100 lbs each panel or post while heavy enough to substain strong winds.

FLEXI STUCCO FENCING PANELS

Designed for DIY Homeowners and Contractors

This system is ideal for DIY homeowners and contractors who want to create unique and stylish wall panels with stucco finishes.

The panels are designed for easy installation, making it simple to add modern architectural textures to interior or exterior walls.

The posts are designed to install directly into the soil, similar to traditional wood split-rail fence systems.

Lightweigh Concrete mix

Sustainable and Lightweight Construction
Each panel is crafted using recycled Styrofoam combined with genuine stucco materials, creating a durable yet lightweight concrete panel. Weighing under 100 pounds each, our panels offer excellent impact resistance, lasting beauty, and efficient installation, making them ideal for both DIY homeowners and professional contractors.

FLEXI STUCCO PANELS

Installation Methods

Interlock between posts for fence and wall systems

Hang with a French cleat or similar anchor for interior applications

Bolt to walls using structural lag screws for secure installation

WHAT TO EXPECT FROM OUR PANELS

Built to last — our panels resist rust, rot, and pests.

Our panels are made from lightweight concrete, allowing them to be installed without the use of heavy equipment.

They are also environmentally friendly, manufactured using recycled Styrofoam, which helps reduce weight while maintaining strength and durability.

Ideal for DIY homeowners seeking an easy-to-install wall or fencing solution, as well as HOA's and properties with limited space that need added privacy walls or screens.

Ideal for landscape, fencing, and outdoor contractors looking to offer their customers more design options and expand their business opportunities.

Our system provides a versatile and modern solution for creating privacy walls, decorative features, and landscape structures.
