

4 STEPS TO SUSTAINABLE EDUCATION AROUND THE WORLD

Mosaic Calling takes a unique, self-sustaining approach to tackling the challenge of education access in developing countries. Through a four-step process, we partner with generous individuals and organizations, invest strategically in coffee farms, empower local schools through coffee profits, and replicate this model to create lasting change across regions. Your support fuels this sustainable cycle, ensuring quality education and brighter futures for children in need.

Partnership

The Mosaic Calling's sustainable education model lies in the power of partnerships. We rely on the generosity of individuals and organizations who share our passion for educational equity. Your contributions allow us to invest in coffee farms, creating a reliable source of funding that fuels our mission.

01

Coffee Farm

These farms aren't simply handouts, but rather become the cornerstone of our self-sustaining model. Profits generated from coffee harvests become a continuous source of income, empowering local communities and ensuring long-term support for educational initiatives.

02

Education

The heart of Mosaic Calling's mission lies in empowering local schools. Profits from our coffee farms are directed to support local schools. Firstly, it allows us to reduce the tuition, making education more accessible for children. Secondly, profits are used to increase teacher salaries ensuring we retain qualified educators.

03

Repeat

Mosaic Calling's model is designed for scalability. As coffee farms flourish, the profits pave the way for establishing this sustainable education system in new regions. This allows us to empower more communities, replicate success stories, and ultimately, brew a brighter future for children worldwide.
