LIMCO Implemented conversion of the Spanish Court Plaza to the Spanish Court Hotel.

The Braco Hotel

As part of the agreement with Melia International who was awarded the Operating Contract for the 36 Hectare facility located on Jamaica North coast. LIMCO was awarded a contract to provide electrical engineering design services for the public areas and the associated facility supporting infrastructure such as the power distribution, water and sewage treatment systems."

GOVERNMENT

EDUCATION & SCHOOLS

Project Synopsis:

The Education Sector Enhancement Programme – EDUTECH 2000 was a radical new approach to the delivery of education in Barbados. The ESEP comprised of four closely inter-related components, one of which is a Technological infrastructure.

We were elated to come onboard in Phase III of the project to provide electrical,

mechanical and network engineering services for the civil component of the programme, which included the rehabilitation, and the construction of new school facilities of sixteen (16) schools covering both phases. Due to our commitment to this project we continued post contract engineering services from our offices in Kingston, Jamaica.

GOVERNMENT

EDUCATION & SCHOOLS

HIGHWAY 2000

Project Synopsis:

Highway 2000 is the center piece of a multi-year Millennium Projects Programme initiated by the Government of Jamaica. The main objective of these projects is to upgrade the country's infrastructure and assist in providing economic opportunities for growth and the creation of jobs. Highway 2000 will connect the capital Kingston with Montego Bay and Ocho Rios passing through St. Catherine, Manchester, St. Elizabeth, Westmoreland, Hanover, and St. Ann.

LIMCO Engineering & Contracting Services was awarded a contract by the developer, Bouygues Travaux Publics (Jamaican) contacted us to provide support services in the design and implementation of the street lighting for the toll plazas, and interchanges. The Scope of Work included the design of the electrical power distribution system, the preparation of working drawings (shop drawings), and the preparation of "As built" drawings. The assignment was successfully completed and we were further engaged for the design of the street lighting system for the Marcus Garvey Drive extension from the interchange to the Greenwich intersection.
