
Lantra Rough Terrain Telescopic

Duration: Will depend on experience 1-5 days training
Award: This course can be trained under either Lantra Awards or bespoke in-house certification
Assessments: The instructor assesses candidates at the end of the training

Description:

The reach truck is a popular piece of equipment in the land-based and construction industries. Training is essential so to ensure that you can operate the reach truck with competence. These training courses meet the HSE standards and provide learners with the necessary knowledge and skills to safely operate the machinery.

On completion of this course you will be able to:

- Identify the basic construction and components, and the purpose and use of all controls and gauges.
- Identify and comply with manufacturers' instructions in accordance with the operator's handbook, other information sources such as rating plates and applicable regulations.
- Carry out all pre-use and running checks.
- Configure the reach truck for travel.
- Manoeuvre in confined areas using forward and reverse direction, both with and without a load.
- Set up the reach truck in order to lift various loads.
- Lift various loads within the full working range of the reach truck.
- Transport loads.
- Place and retrieve loads accurately at various places.
- Place and retrieve loads from a vehicle bed or trailer.
- Keep within safe working parameters.
- Place the reach truck in an out-of-service condition.
