THINGS YOU SHOULD BE ABLE TO DO WITH YOUR SMARTPHONE

MAKE PHONE CALLS-*

Adding contacts, call waiting, 3-way calling

TEXTING- *

With your smartphone you should be able to send and receive text messages (SMS/MMS) as well as save photos from text messages and attach photos to text messages. Send a group text.

TAKE PICTURES/VIDEOS-*

You should be able to take pictures and video with your smartphone as well as use the timer, flash and change the mode of your camera. Locate your pics, cut and crop and screenshot. Using QR Codes.

PLAY GAMES/DOWNLOAD APPS

You should be able to download apps from your App store.

USE THE SETTINGS MENU

WIFI, BLUETOOTH, SOUNDS, DISPLAY, ETC...

SEARCH THE WEB

chrome

With the browser or Google Search app, you should be able to perform a search on your smartphone.

GPS APPS (WAZE/GOOGLE MAPS)-*

You should be able to successfully use your GPS app to get directions to any location.

BACK UP TO THE CLOUD

iCloud

You should have a backup mechanism in place to backup your photos.

PERFORM BASIC MAINTENANCE

You should be able to clear your cache and your browser history. Close open windows.

Scan a QR code with your iPhone, iPad, or iPod touch

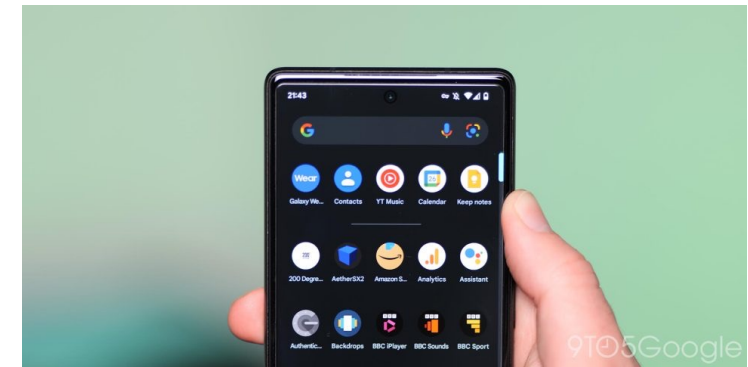

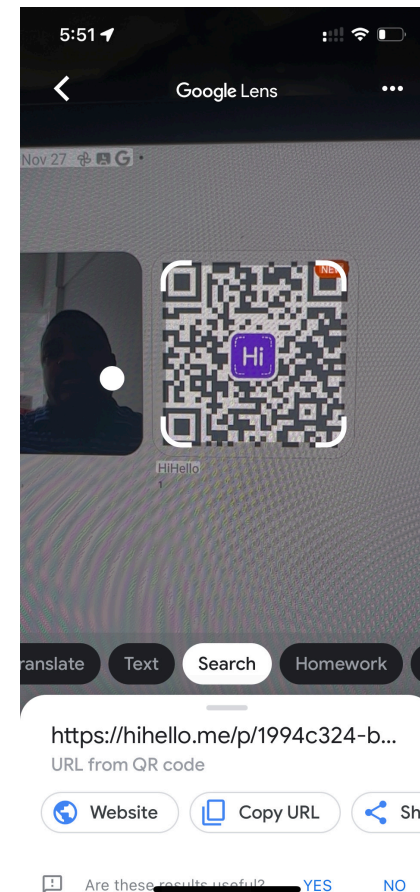

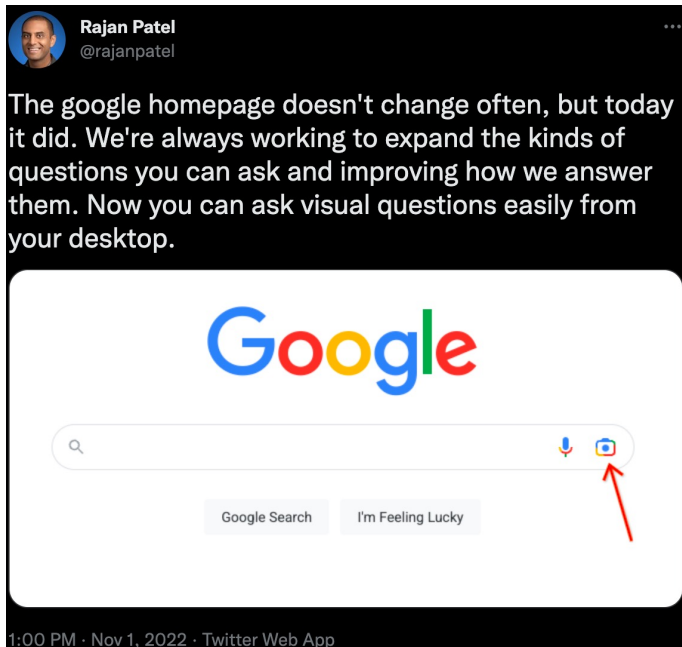

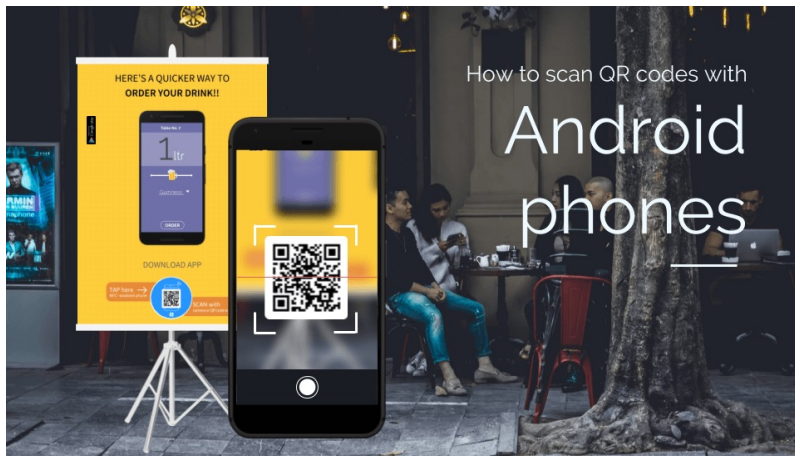

1. [Open the Camera app](#) from the Home Screen, Control Center, or Lock Screen.
 2. Select the rear facing camera. Hold your device so that the QR code appears in the viewfinder in the Camera app. Your device recognizes the QR code and shows a notification.
- Tap the notification to open the link associated with the QR code.

WHAT IS A QR CODE?

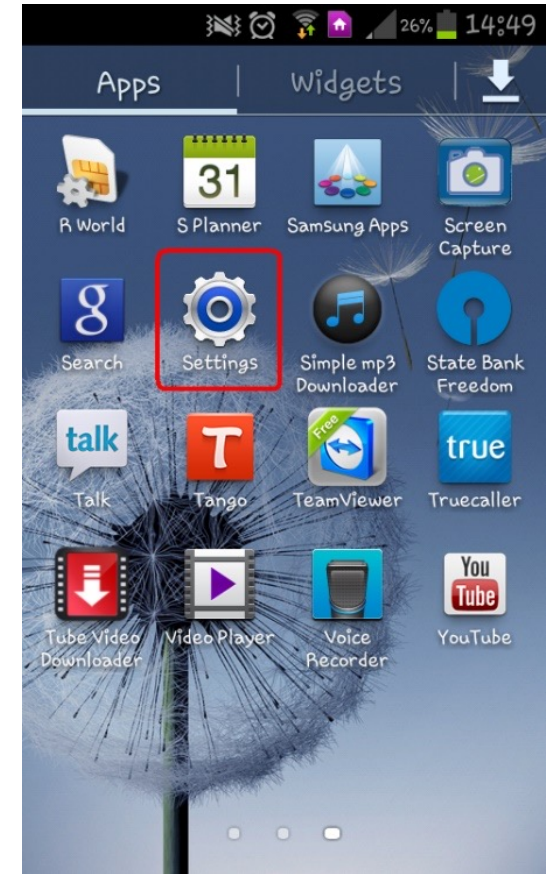

A QR code is a 2-D barcode that can be digitally read by smartphones. QR codes contain information just like barcodes. They can be used to make a call, send a message or email, or even open a website.

Some Android smartphones have a QR reader built into their smartphone. Others can use the Google Search to search the QR code.

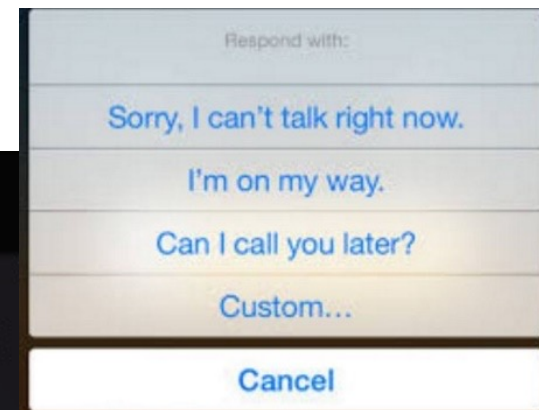

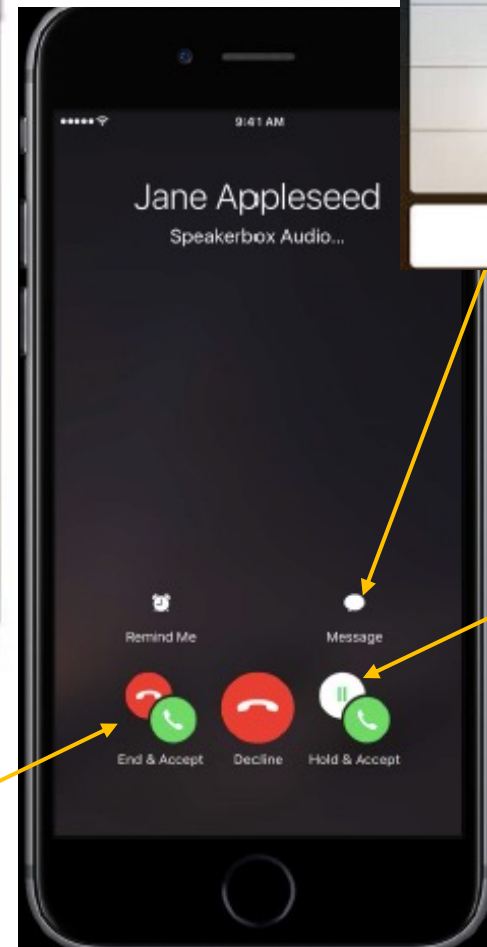

THE SETTINGS MENU

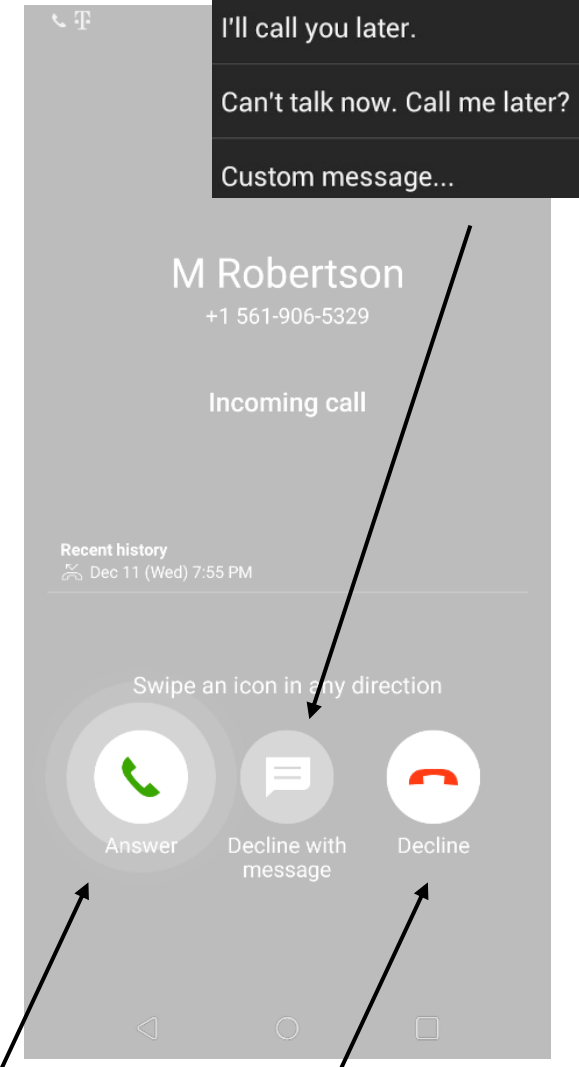

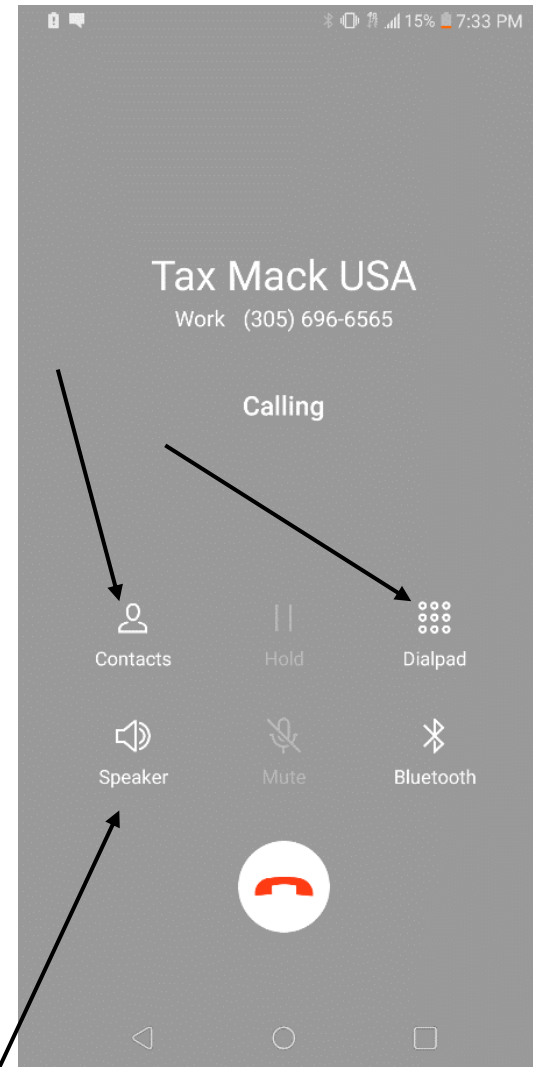

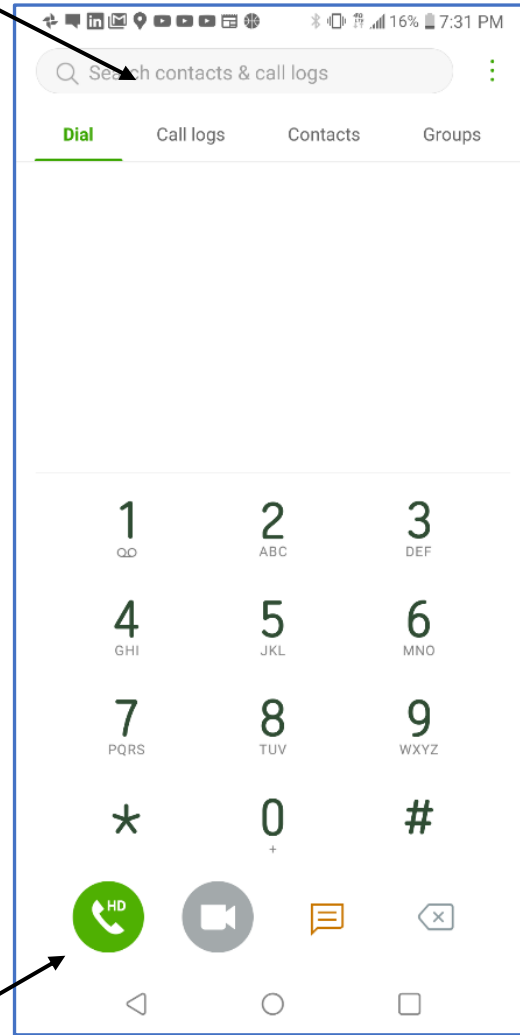

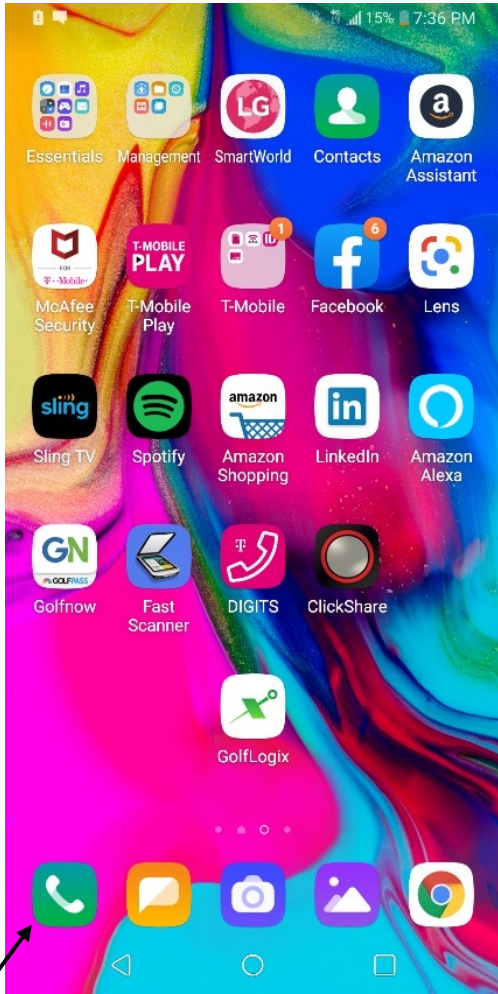

- **TURN ON/OFF WIFI
ACCESS TO WIRELESS NETWORKS**
- **ADJUST SCREEN TIMEOUT**
- **SOUNDS AND DISPLAY**
- **PHONE MODEL AND STORAGE**

MAKING PHONE CALLS (iPhone), Call Waiting and Adding a Call

MAKING PHONE CALLS (Android), Call Waiting and Adding a Call

CONTROL PANEL (iPhone)

iPhone X and later

To open Control Center, swipe down from the top-right corner of your screen.

To close Control Center, swipe up from the bottom of the screen or tap the screen.

If you swipe too close to the top-center of your screen, you might open Notification Center instead of Control Center.

Portrait Orientation Lock: Keep your screen from rotating when you move your device.

Camera: Quickly take a picture, a selfie, or record video.

Brightness: Drag the brightness control up or down to adjust the brightness of your display.

Timer: Drag the slider up or down to set the duration of time, then tap Start.

iPhone SE, iPhone 8 and earlier

To open Control Center, swipe up from the bottom edge of any screen.

To close Control Center, tap the top of the screen or press the Home button.

Calculator: Quickly calculate numbers, or rotate your device to use the scientific calculator for advanced functions.

Volume: Drag the volume control up or down to adjust the volume for any audio playback.

Do Not Disturb: Turn on to silence notifications for an hour or until the end of the day. Or turn it on just for an event or while you're at a location, and it automatically turns off when the event ends or you leave that location.

Flashlight: Turn the LED flash on your camera into a flashlight. Touch and hold the flashlight to adjust the brightness.

Open Settings and scroll down
Tap Safari.

Scroll down again and tap
'Clear History and Website
Data'.

Tap 'Clear History and Data'.

FIND MY.....

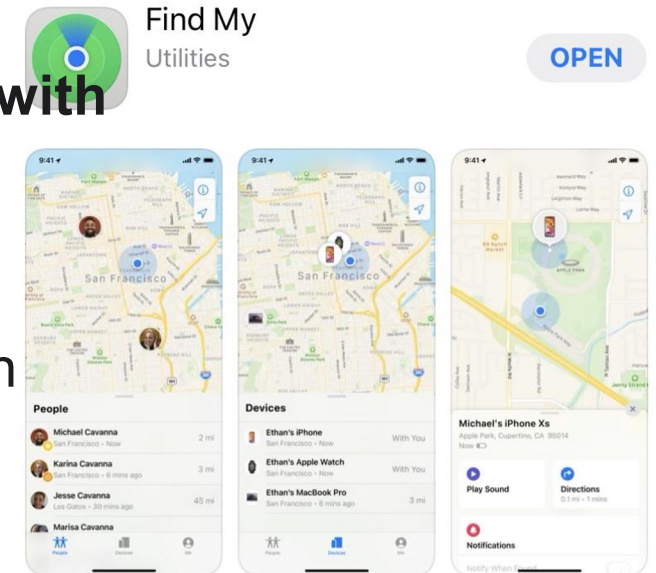

The Find My app makes it easy to locate your Apple devices and keep up with friends and family. It works on iPhone, iPad, and Mac — even if your missing devices are offline. And your privacy is protected every step of the way. Also access Find My from a computer by going to www.icloud.com and enter your Apple ID and password, then select **Find iPhone**

See all your devices on a map. Is your iPad at home? Use the map to get a full picture of where your devices are — and where a missing one might be. Some devices can also mark their location when the battery is critically low, to help you find them even if they run out of power.

Compatible with

- iPhone
- iPad
- iPod touch
- Apple Watch
- Mac

FIND MY DEVICE (Android)

Find My Device helps you locate your lost Android and lock it until you get it back.

Features

See your phone, tablet or watch on a map. If current location isn't available, you'll see the last known location.

Use indoor maps to help you to find your device in airports, malls, or other large buildings

Navigate to your device with Google Maps by tapping the device location and then the Maps icon

Play a sound at full volume, even if your device is on silent

Erase the device or lock it with a custom message and contact number on lock screen

See network and battery status

See hardware details

Google Find My Device
