

## WiFi

Password is "panacea139"...On your device turn on WiFi, select Panacea Place – 5G –Guest for 5G service (400+ Mbyte/sec) or Panacea Place – Guest (broader range slightly slower speed).

## Bluetooth audio and stereo

**Note: a cooling fan blows down onto the receiver, never set anything on the receiver that could block the airflow.**

Turn on the stereo, turn volume to  $\leq -20$  (quieter is  $-40$  e.g.), push DAT/TAPE MON, on phone make a Bluetooth connection to BluMe HD, adjust media volume on phone. Select a music app to play your music. Use stereo and/or phone for volume control (stereo will set upper limit so if not loud enough turn up the stereo).

To listen to stereo (tuner or CDs) ensure DAT/TAPE MON is toggled off and select CD or tuner. Useable radio stations are presets on the receiver.

## Live TV and Streaming apps

*Using Roku remote:* To turn the TV on, push the red power button on the top. Push the home button near the top on the right side of the remote. Then using the arrows and OK purple button cluster, navigate to and select Fubo to view Live TV or select a different streaming app (e.g. Netflix, Amazon Prime, Disney Plus, etc.) Except for Fubo, you must have your own subscription and will need to input your login information. Don't forget to log off before departure. The back arrow on the top left is your friend to take you back to menus or where you just were. **Important when using Fubo!** Please use only the Panacea Place Guest profile. Please respect the privacy of Pat & Cathy and leave our profile untouched. Do not delete any profiles. Within the Panacea Place Guest profile, you can set Live TV to record shows or events and view them at your leisure. There are lots of instructions I could continue to write, but it would be exhausting for both of us, so if you need additional help, please let Pat know and he will provide guidance.

**TV volume** can be controlled using the Samsung remote with the +/- button (push in to toggle mute/unmute) *or* using the volume buttons on the right side of the Roku remote

## Panacea Place Exclusive Videos

*Using Samsung remote:* To turn the TV on, push the red power button on the top left. The Smart Hub (little house) button will toggle the TV menu on and off. With the TV menu on, use the ring/circle buttons to navigate to and select the UDisk icon at the bottom of the screen. Select a video and enjoy. Volume is adjusted with the +/- button. Pushing *in* on the +/- button will mute and unmute volume.
