HYDRAULICS DONE RIGHT!

Outright Hydraulics provide a wide range of hydraulic services, maintenance and components to support your company's needs.

We have over a decade of hydraulic experience, within most industrial sectors including: Mobile, Industrial, Offshore and subsea. We are best placed to handle the majority of hydraulic services which would be required. This ranges from full system design to hydraulic fault finding and servicing. We develop long lasting partnerships and will go the extra mile to make sure we exceed our clients expectations.

Services Provided (Including but not limited to):

- **Hydraulic System Surveys (First survey free for new customers)**
- **Spares and Procurement**
- **Hydraulic System Design**
- **Hydraulic Power Units (HPU)**
- **System Fault Finding**
- **Hydraulic System Servicing**
- **Sub Contracting Services**
- **Over the Phone Help Service**
- **System Upgrades**
- **3D CAD Design**
- **Hydraulic Circuit Design**
- **Electrical Panel Supply**

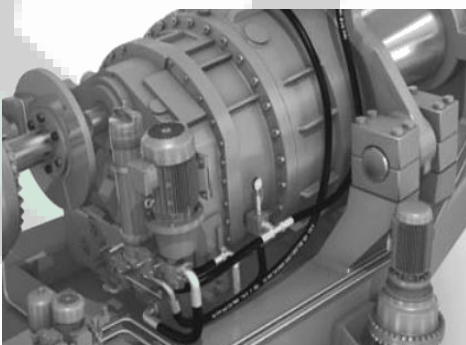

- **System Efficiency Survey and Improvement Service**
- **Hose Survey and Supply**
- **Oil Contamination Testing**
- **Reverse Engineering of Hydraulic Systems**

Hydraulics Components

Products from: Sun Hydraulics, Winner, Parker, MP Filtri, Kawasaki, Metaris, Vickers, Dennison, Aron, KTR, JBJ, Pall, Wika, plus many more.

- **Pumps**
- **Power units**
- **Motor pump sets**
- **Accumulators**
- **Valves**
- **Cylinders**
- **Hydraulic Motors**
- **Filters**
- **Fittings and Seals**
- **Instrumentation (Gauges, Sensors etc)**
- **Hose Assemblies (With hose lists)**

Site Services

Outright can carry out general hydraulic services on the majority of hydraulic systems. From component change out to hose and seal replacements we have you covered.

Hydraulic Out Sourced Maintenance Solutions

Outright Hydraulics provides a wide range of comprehensive servicing and maintenance solutions. To suit your hydraulic infrastructure.

Our main focus being preventative maintenance to help reduce the chances of breakdown halting your business. Issues can be spotted during regular inspections and corrected on your terms when systems can be shutdown.

Hydraulics Manifold Design

Manifolds keep systems compact and can reduce the amount of fittings and hoses within a system. We can design and supply full manifold assemblies for any hydraulic configuration.

Hydraulics Fault Finding

We have many items of hydraulic test equipment ranging from hydraulic flow and pressure testers to digital pressure gauges. This enables us to do the majority of fault finding on site. This means faults can be identified and components changed out with the least amount of down time and cost.

Hydraulics Consultancy

Do you have a project coming up which needs some hydraulic expertise. Outright can offer tailored consultancy to make sure your projects hydraulically perform as you require.
