

# One New Cabin Air Filter Saves You Time, Money & Shelf Space

Scan Me To Learn More

## CUT INVENTORY BY UP TO 50+%

Simplify your operation

Reduce inventory complexity and eliminate costly hot-shot deliveries

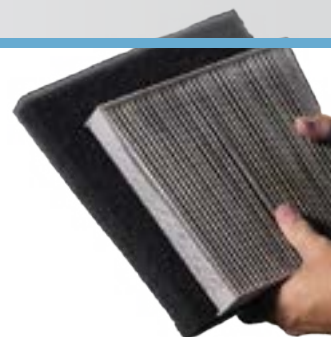

Consolidates dozens of filter SKUs

## FIT 80% OF SALES VOLUME WITH ONE CABIN AIR FILTER

Perforated for easy installation

Polyurethane foam technology with 50+ years of superior filtration performance

Premium quality & reliability

## SUPERIOR FILTRATION FOR HEALTHIER AIR

**MERV  
9**

### Tested & Proven to provide exceptional air filtration:

- Harmful allergens
- Debris, dirt & dust
- Germs, mold & mildew
- Odors & airborne contaminants
- Germicidal & mold-resistant

### Backed by rigorous industry standards:

**MERV 9 Rating:** Meets & exceeds OEM standards

**Meets** ASHRAE 52.2-2017 & ISO/TS-11155-1 industry test standards

**Durability Burst/Collapse Testing:** Outperforms paper to ensure longevity

## INSTALLATION IS AS EASY AS 1-2-3

## DURABILITY & LONGEVITY: BURST/COLLAPSE TESTING

The Qik-FIT filter was put through burst testing, which applies increasing air pressure to the filter while it's installed in the housing. As pressure increases, they look for the point at which the filter deforms, collapses, or bursts.

During testing with a high-pressure differential, the traditional pleated filters dislodged and wedged into the housing. The Qik-FIT filter maintained a low-pressure differential throughout the process, proving durability meets or exceeds manufacturer standards.
