

Pre-Treatment Checklist

How to Prepare Your Home for a Bed Bug Treatment with Integrated Bed Bug Removal

Preparing your home properly helps us eliminate bed bugs quickly and effectively. Follow this checklist before your scheduled treatment:

✓ **Reduce Clutter**

Remove unnecessary items from floors, under beds, and furniture.

Bag loose items and store them in sealed containers in another room.

✓ **Wash & Dry All Fabrics**

Wash bedding, clothing, curtains, and linens on high heat.

Dry everything on the highest heat setting for at least 30 minutes.

Store cleaned items in sealed plastic bags or bins.

✓ **Vacuum Thoroughly**

Vacuum carpets, rugs, floors, mattresses, and baseboards.

Dispose of the vacuum bag or empty the canister outside your home.

Don't forget furniture, especially cracks and crevices.

✓ **Move Furniture Away From Walls**

Pull beds, couches, and dressers at least 18 inches from walls.

This gives our technicians full access to treat all hiding spots.

✓ **Do Not Move Items Between Rooms**

Avoid transferring furniture, bags, or clothing from infested areas.

Moving items can spread bed bugs to other parts of your home.

🧠 **Pro Tip: Trust the Bed Bug Experts**

At Integrated Bed Bug Removal, bed bugs are all we do. With over 5 years of experience and hundreds of successful treatments, our certified bed bug exterminators know how to get the job done right—with the best bed bug products and proven methods.
