

“Hummers”

These units use a low intensity gauss PEMF to deliver preset frequencies that **resonate receptors** at the cell membrane

No instant results or feeling of the session is achieved

Requires longer use to achieve results

Sessions are between 40-90 minutes.

“Ringers”

These units use a high intensity PEMF Pulse to deliver harmonic impulses that **resonate the entire cell membrane.**

Instant results and mild to strong sensations are felt by the patient

Short term and long term result can be achieved in days

Sessions are effective in 20 min or less

- Using a high Gauss output to fluctuate the cell membrane to nudge communication to the nucleus.
- Nerve Repair (Fires the nervous system)
- Block Pain (Immediate relief)
- Fluctuate scar tissue (Fluctuates every cell membrane)
- Muscle is firing (Biological response)
- Patient experiences the field on their sensitive areas.
