HELMHOLTZ FIELD CAPABILITIES

A Helmholtz Field is created when you bring two magnetic fields together. Magnetic impulse generators have been used to create this type of field.

IMPULSE GENERATOR TECHNOLOGY

- Reset Cell Membrane Potential
- Produce / Store More ATP
- Increase Cell Membrane Permeability
- Purge Cell Toxins

The lower the cell membrane potential, the less permeable the cell membrane. PEMF can purge cell membranes of toxins and improve ATP production to recharge the cells to a healthy state.
