

SUSTAINABILITY STATEMENT

ROCK CANYON OIL
EVERY BARREL COUNTS

A BETTER WAY TO MANAGE USED OIL

The Environmental Protection Agency and State of Utah Department of Environmental Quality acknowledge that re-refining used motor oil and other petroleum products is the most responsible method for handling used oil generated at commercial facilities.¹ When you re-refine used oil with Rock Canyon Oil, you contribute to sustaining our planet's natural resources by ensuring oil products are not discarded improperly or burned as fuel.² Remember, oil never wears out...it just gets dirty!

ZERO WASTE STREAM

Rock Canyon Oil takes great pride in that we operate as a zero waste stream facility. Our equipment first removes water and light fuel components. Then, the de-watered oil is purified and separated into base oil with a small volume of re-refined fuel. The heaviest oil remains with dirt, contaminants and spent additives. This becomes an asphalt extender oil used in asphalt paving projects. The recycling loop is closed when our base oil is blended with new additives for use in hydraulic oils, passenger car motor oil and other industrial oils. Rock Canyon Oil is pleased to provide the highest level of environmental stewardship regarding the responsible management of used oil.

PERMITTING, LICENSING & INSURANCE

Rock Canyon Oil currently holds three permits as issued the State of Utah Department of Environmental Quality, Used Oil Division. As a Used Oil Transporter, Used Oil Marketer and Used Oil Processor/Re-refiner we are subject to regular audits and inspections to ensure our facility is safe and operating in accordance to our permit. Recent changes to Used Oil regulations (resulting from the infamous Eco-Tech situation) have further increased the scrutiny on facilities like ours. Currently, we are the *only* used oil re-refinery located in the state of Utah. Our EPA ID number is listed at the bottom of this page and is on all our trucks and paperwork. Copies of any permits, licenses or certificates of insurance are available upon request.
