

NanoString Panel Pro User Guide

Panel Pro is an interactive tool on the NanoString website designed to help you browse nCounter® gene expression panels by application area, pathway, biological process, and/or gene(s). Search our library of inventoried and made-to-order panels for particular genes or upload a gene list to compare your own curated content with specific panels. Compare your gene list to multiple panels or compare multiple panels to each other. As always, please contact bioinformatics@nanosttring.com for help with Custom CodeSet designs!

In this user guide, you'll learn how to search for a panel, application area, pathway, or biological process as well as to search for particular genes and compare panels to one another or to an uploaded gene list.

Let's get started!

How to Search for a Panel

1 Enter the search term in 'Browse Panels' and click on 'Search Panels'

Choosing the right gene expression panel for your research is now easier with the NanoString Panel Pro panel selection tool! Browse our catalog of inventoried and made-to-order panels by name, application area, biologic pathway/process, or gene name(s). Upload your own gene lists to find the panel that best matches your selection or compare gene coverage across multiple panel types.

As always, reach out to bioinformatics@nanosttring.com for help with **Custom CodeSet** designs!

Browse Panels
