

The Book Hooks Schoolhouse

2025-2026 Pilot: Online Option

Grades 6-9

Same Mission Different Format

Partnering with parents to develop deep thinkers with a passion for Christ, exploration, and conversation.

What is offered?

- Daily assignments and accountability for core subjects: English, Math, Science, History
- Weekly zoom discussions and opportunities to interact with other online students
- Individualized writing instruction and teacher feedback
- Math tutoring as needed
- In depth, interest driven, monthly projects

How it works:

Your student will be equipped for success when logging into the student portal for Spark Your School to see the assignments for the day. All handouts, instructions, and assignments will be listed. Students will have a combination of literature, textbooks, journaling, videos, and projects to complete. Uploaded work, responses in text boxes, participation in group conversations, and opportunities to pursue individual passions will allow for in depth learning as we study early American history, physics and chemistry, math, grammar and writing.
