

## **Product Information Bulletin**

### **FISI-100**

---

#### **DESCRIPTION:**

FISI-100 is an organic sodium citrate stick designed to help unload fluids from a dead well. Best results are achieved by dropping 2 to 3 LSS-511 soap sticks prior to using FISI-100.

FISI-100 will agitate the fluid and cause the foamer to begin working. This lightens the hydrostatic head and allows the gas to travel through the foam column to help unload the well.

FISI-100 is packaged in 5 gallon pails containing 48 units.

#### **Handling Precautions:**

For more information contact your nearest Lone Star Industries Representative. Also for information regarding safety precautions in handling, health hazards, and exposure, please refer to the Material Safety Data Sheet for this product.
