

Product Information Bulletin

SAPP Stick A SOLID PERFORMANCE PRODUCT

DESCRIPTION:

Lone Star Industries' **SAPP Stick** is a solid product composed of a combination of surfactants and blended with sodium acid pyrophosphate. This product was primarily designed as a dispersant/mud thinner promoting less wear and tear on shaker screens, preventing mud ring formations, reduces PH levels, inhibits calcium build-up and prevents bit balling.

Lone Star Industries' **SAPP Stick** also contains highly cationic compounds that will form a tenacious and persistent film on mild steel thereby providing effective protection against overheating and formation damage.

TYPICAL PHYSICAL PROPERTIES:

Form	Solid, Cylindrical
Color	White
Density @ 77°F (g/ml)	1.285
Density @ 77°F (lb/gal)	10.70

HANDLING AND STORAGE:

Lone Star Industries' **SAPP Stick** is an industrial chemical product. All safety and handling warnings on the product container and the material safety data sheets should be observed. For detailed safety and disposal information please refer to the material safety data sheet. Store in a cool, dry location.
