NEW(GENESIS.GEDMATCH.COM)

This is the login page for GEDmatch Genesis. These pages allow uploads and comparisons between kits from testing companies not yet supported on the regular GEDmatch pages. It also provides a place for us to test the new algorithm and software that will support this expansion. **These pages contain early Beta test code. Results are likely to change from time to time.** Results and presentation on these pages may differ slightly from results on the regular pages. Our plan is to periodically add additional applications here, and eventually merge these capabilities with the regular GEDmatch pages, to provide full cross-comparisons between test results from all companies.
