

Mobile Optometry Services

Why Are Eye Exams Vital For Children?

- The visual system is still developing during childhood, and early intervention plays a pivotal role in preventing and addressing ocular conditions & diseases
- Many eye conditions such as lazy eye (amblyopia) if left untreated can permanently reduce visual capability and can impact a child's ability to learn and perform well in school
- Visual deficiencies can sometimes even be misdiagnosed as behavioral or sensory issues

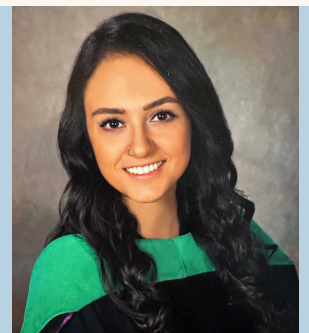

Many systemic & eye conditions can initially present without any symptoms and are only picked up through eye examination, making annual visits a vital part of routine healthcare

What Mitten Mobile Eyecare Can Provide You

- Full comprehensive eye exam on-site at school. Exam is equivalent to one your child would receive in an optometry office.
- These are **not the same as vision screenings** - vision screenings are minimal and do not provide a final glasses prescription or full evaluation of the ocular health
- Assistance in picking out glasses that are **covered by patient's insurance** (when applicable), with on-site delivery at a later date.
- Appropriate referrals for additional treatment/intervention when necessary
- Emergency office visits when necessary/appropriate
- All services and glasses billed to insurance- A large variety of insurances accepted, **including Medicaid plans**

We redefine the standard of eyecare by bringing comprehensive and compassionate medical examinations directly to our patients' doorstep.
