

TRI-Filtration Consultants is pleased to offer the following services to help you with your Filtration Goals with 40+ years of experience in the Filtration Industry. We are not part of the sales process, we are here to help you to accomplish your goals in filtration to help you set your standards for your projects.

When Filtration is done right in any Industry it saves more budget dollars than doing it wrong!

If you are looking for a solution or directions to get started give us a call.

- Understanding IAQ and why it is so hard to maintain.
- What type of filter(s) to use in your application (air, water, gas)?
- Filter Service Review or Setup?
- Should I be Monitoring my IAQ or other filtration performances?
- Do you really need the added cost of Air Cleaners or other supplemental Air Cleaning?
- I need to improve my filtration (on any type of equipment), what do I need to accomplish my goals?
- When should I really change my air filters? Schedule PM? As needed?
- Can I really save energy with my air filters?
- Building under Negative Pressure? We can help!

Equipment

- Transmission Belts & Sheeves
- Water Filtration Systems

Respectfully,
Mack Barnhardt

How Can We Help?

- Customer Saved \$30,000 yearly on air filter replacements on HVAC Equipment.
- Just by switching from an unsealed MERV 8 to a sealed MERV 8 customers filters lasted 2-3 times longer
- Using the right odor control media, you can last up to 2 times longer.
- Did you know we have v-belts on the market that last up to 10 years with no tensioning after install?
- We have v-belts on the market that are as durable as timing belts and just as efficient!
- There are no reasons to have sewer odors in your building. We can control sewer odors in your building,
- Something not listed, please ask us and maybe we can help or point you in the right direction.
