327	29	Vogelzang VG5790 EPA Pellet Stove - VG5790	Used, in excellent condition, Comes with two 40 lb premium grade wood fuel pellets. Includes exhaust pipe. Air wash glass for viewing pleasure, 3 Inch exhaust fits most chimney systems, 65,000 BTU's of clean burning heat, provides up to 2,200 Sq. Ft. heating capability, massive 120 lb hopper provides storage for up to 60 hours of burn time, digital controls with temperature readout and remote control. To power this burner, it has a massive 120 lb hopper that offers up to 60 hours of burn time between fillings. On the brains side, the side mounted controls are easy to use and offer simple adjustments to keep you comfortable. It can be used in manual mode as well as an automatic mode with a temperature set point. So that you can adjust it from your recliner, it comes with an infrared remote control. Pellet heaters work by using a software driven control board to precisely deliver a pre-determined amount of fuel from the hopper into a burn chamber. An electric heating element, used only in startup, heats the pellets until they ignite. The combustion blower forces air through the burn chamber and once ignited, it provides an active combustion of the pellets resulting in very little ash. The exhaust and heat pass through one side of air chambers where on the other side, the variable speed room blower gathers the heat and distributes this through the room. This entire process results in a very clean burning, efficient heating machine for your home. It is a durable, modern design built for years of quality performance.
