HIPAA Privacy Policy

THIS NOTICE DESCRIBES HOW MEDICAL INFORMATION ABOUT YOU MAY BE USED AND DISCLOSED AND HOW YOU CAN OBTAIN ACESS TO THIS INFORMATION.

INTRODUCTION

Nabil Keith M.D. is required by law to maintain the privacy of "protected health information". "Protected health information" includes any identifiable information that we obtain from you or others that relates to your physical or mental health, the healthcare you received, or payment for your healthcare.

As required by law, this notice provides you with information about your rights and our legal duties and privacy practices with respect to the privacy protected health information. This notice also discusses the uses and disclosures we will make of your protected health information. We must comply with the provisions of this notice, although we reserve the right to change the terms of this notice from time to time and to make the revised notice effective for all protected health information we maintain.

PERMITTED USES AND DISCLOSURES

We can use or disclose your protected information for the purposes of treatment, payment and healthcare operations. For each category, we will explain what we mean and give some examples. However, not every use or disclosure will be listed.

Treatment means the provision, coordination or management of your healthcare, including consultations between healthcare providers regarding your care and referrals for healthcare from one healthcare provider to another. For example, a doctor treating you for a broken leg may need to know if you have diabetes because diabetes may slow the healing process. Therefore, the doctor may review your medical records to assess whether you have potentially complicating conditions like diabetes.

Payment means activities we undertake to obtain reimbursement for the healthcare provided to you, including determinations of eligibility and coverage and utilization review activities. For example, prior to providing health care services, we may need to provide to your health plan information about your medical condition to determine whether the proposed course of treatment will be covered. When we subsequently bill your health plan for services rendered to you, we can provide them with the information regarding your care if necessary to obtain payment.

Health care operations means the support functions of our practice related to treatment and payments, such as quality assurance activities, case management, receiving and responding to patient complaints, physical reviews, compliance programs, audits, business planning, development management and administrative activities. For example, we may use your medical information to evaluate the performance of our staff when caring for you. We may also combine medical information about many patients to decide what additional services we should offer, what services are not needed, and whether certain new treatments are effectives. In addition, we may remove information that identifies you from your health information so that others can use this de-identification information to study health care delivery without learning who you are.
