**TRAINING PROGRAM
PRE-COURSE QUESTIONNAIRE**

Thank you for your interest in the Basic Pistol Course Training Program through T&C Gunsmithing. The goal of this course is to develop your basic knowledge, skill, and attitude for owning and operating a pistol safely.

This is a blended training course, which means a portion of the course will be conducted in a classroom environment where you will have gun safety rules, types of pistols, proper operation of revolvers and semi-automatic pistols, ammunition knowledge and selection, selecting and storing a pistol, the fundamentals of pistol shooting, clearing stoppages, zeroing, pistol shooting errors, and pistol inspection and maintenance.

With an NRA Certified Instructor you will now demonstrate comprehension and application of pistol shooting fundamentals, stable shooting positions, live fire and shooting a final qualification. When the entire course is completed, training doesn't have to end. This is only the beginning. You can work with your NRA Certified Instructor on opportunities to return to the range to continue building confidence and better marksmanship skills.

I have read the description of the Basic Pistol Training Program which is being presented by T&C Gunsmithing, understand it's goals, and I am interested in attending a course to prepare me to receive a certification in Basic Pistol.
