

## EQUATIONS AND FORMS FOR THE HEAVY TRUCK CRASH RECONSTRUCTIONIST

Contents Include

Description	Page
Symbols and Definitions	3
Discussion on Scaler and Vector Quantities	4
Notation	4
Newton's Laws of Motion and Conversion Table	5
1. Gear Ratio Speed Analysis	5
2. Event Data Recorders	6
3. Adjusting Tire Revolutions per Mile	7
4. High Resolution Vehicle Distance (HRVD) Conversion Meters to Miles	8
5. Low Speed (Quasi-static) Off Tracking	8
6. Side Under-Ride Speed Analysis	8
7. Dynamic Rollover Threshold	9
8. U.S. to S.I. Conversions	10
9. Load Shift to Initiate a Rollover	10
10. Heat Effects on Measured Pushrod Stroke	11
11. Pushrod Force Iteration	11
12. Pneumatic Brake Force Equations	12
13. Pneumatic A.B.S. Brake Force Equations	12
14. Change in Speed and Velocity	13
15. Kinetic Energy and Rear Under-ride Equations	13
16. Trailer Stability Equations	14
17. Conservation of Linear Momentum and External Impulsive Forces	15
18. Response to a Lead Vehicle	15
19. Lateral Acceleration Equations	16
20. Acceleration Rates from Torque and Horsepower	16
21. Center of Gravity by Lifting a Trailer	17
22. Center of Gravity by Lifting a Tractor	17
23 - 24. Obtuse and Acute Triangles	18
25. ECM Gear Ratio Recommended Limit	19
26. Axle Weight Reconstruction and Location of the Horizontal CM	19-20
27. Spin Analysis	21
28. Velocity or Closing Speed Analysis	21
29. Comparison of Vehicle Make and Engine Type	22
30. Summary of 204 Heavy Truck Acceleration Tests	22
2016 Pushrod Force Charts	23 - 30
Heavy Truck Post-Crash Inspection Forms	31 -35
Heavy Truck Event Data Form	36
Heavy Truck Event Data Attribution Worksheet	37

For Purchase Contact **Scott Skinner** at [skinnerrecon654@hotmail.com](mailto:skinnerrecon654@hotmail.com)

**Cost: \$43.00 US (includes shipping)**
