FORENSIC PHOTOGRAPHY IN DEATH INVESTIGATIONS

\$80.00

CLASS DETAILS

December 4, 2025
11:00 AM - 2:00 PM EST

Live Webinar - Link will be provided to participants via email on the day of the webinar.

Instructor:

Ashley Luth, CSCSA
Forensic Science Assistant Supervisor

Class is approved for 3 hours of ABMDI & IAI Crime Scene Recertification credits.

This training covers the full process of photographic documentation, from scene orientation and overall views to detailed images of the deceased, injuries, and postmortem changes. The training also highlights the integration of specialized technology, including UV/IR photography and the use of alternate light sources, while reinforcing the importance of foundational photographic practices.

Key Topics Include:

- Core principles of forensic photography
- Photographing death scenes and sequential techniques
- Photographing the deceased, including injuries and key correlated evidence
- Special considerations and challenges
- Common mistakes and how to avoid them

This training is designed for crime scene investigators, death investigators, and forensic professionals responsible for documenting death scenes and deceased individuals.
