This two-day, hands-on course provides practical training in the recognition and identification of human and animal skeletal remains. Participants will gain extensive experience examining human and animal bones while learning the fundamentals of human osteology and the key characteristics used to distinguish human from non-human remains.

Key Topics Include:

- Human Osteology and Skeletal Anatomy
- Adult and Juvenile Human Bone Identification
- Human vs. Animal Bone Identification
- Comparative Animal Osteology
- Fragmentary and Unidentified Bone
- Field Recognition and Assessment
- Hands-On Identification Exercises

By the end of this training, participants will have a strong foundational understanding of the human skeleton and increased confidence in recognizing skeletal material and distinguishing human from animal bones encountered during searches, recoveries, and death investigations.
