DID YOU KNOW?

From interviewing the first witness to following leads during an inquiry, time is critical, each interview is unique and will provide valuable information you can use to support your case.

Having access to vehicles and equipment presents a certain level of risk to the employer and employee. Has your business ever been contacted with respect to a motor vehicle / equipment incident that involved your business property that you were not aware of? Has anyone in your company been served with documents that relate to a work-related incident you were not made aware of? Are you prepared?

Insurance benefits help sustain quality of life and support us financially in the event of an unplanned incident. But what if the incident was planned? What if a health care provider bills for services that were not provided? What if that motor vehicle collision was staged? What if the person involved in a collision is making false claims? What if a claimant deliberately set fire to property in order to receive payment for damages? Insurance fraud costs us all.

A major incident on any highway can involve people from coast to coast across the continent. At ARG, we have no geographic limitations. We offer our Investigations and Risk Solutions services to our customers throughout the golden horseshoe, the greater Toronto area, as well as King Township, Peel, Durham, and York region(s), Kawarthas, and Northumberland County. We are also known to travel to other regions such as the Muskokas, greater Sudbury district, and other northern regions of Ontario, even into Manitoba. These areas include Sault Ste Marie, Timmins, Folyet, Thunder Bay, Sioux Lookout, Nikina, Winnipeg, and beyond. We'll go anywhere to locate and interview witnesses.

Our services:

- ❖ Corporate investigations | Surveillance | Interviews
