- DRIVER ERROR HAS BEEN IDENTIFIED AS A MAJOR CONTRIBUTING FACTOR IN 90% OF HEAVY VEHICLE CRASHES
- DISTRACTED DRIVING CONTRIBUTED TO AN ESTIMATED 21% OF FATAL COLLISIONS AND 27% OF SERIOUS INJURY COLLISIONS IN 2016
- AND THESE STATISTICS ARE PART OF UPWARD TREND OF DISTRACTED DRIVING-RELATED COLLISIONS, UP FROM 16% OF FATAL COLLISIONS AND 22% OF SERIOUS INJURY COLLISIONS A DECADE EARLIER

Defensive driving plays a big role in mitigating against the risks associated with our commute each day. The decisions we make while driving have an impact on every motorist, pedestrian, cyclist, etc. that use our infrastructure to get where they need to go. Always think a few steps ahead and plan your exit strategy in the event of a potential incident. Don't get caught in Cluster Foxtrot where you need to start asking What The Foxtrot just happened. Be proactive and minimize your risk.
